Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas

Vol. 20 No. 15 | Lancaster Farming, Saturday, February 22, 1975 | $2.00 Per Year

Mr. and Mrs. Elvin T. Harnish, Willow Street R1, accepted congratulations and a plaque from Daniel L. Martin, right, in honor of their 25 years of membership in the Inter-State Milk Producers Cooperative. Martin, Inter-State vice-president from Manheim, made the presentation during the Inter-State District 7 annual meeting in Mount Joy on Thursday.

Pesticide Law Calls For Spray Licenses

Federal pesticide laws now require that every state set up some sort of licensing procedure for just about everyone who uses herbicides and insecticides, including farmers. Henry F. Nixon, director of the Pennsylvania Department of Agriculture's Bureau of Plant Industry, is the man in charge of seeing that Pennsylvania meets the federal requirements by 1976.

The law has caused much concern among area farmers who feared that they would be stopped from using any of the chemical weapons they've been using in the past to battle weed and insect foes. Nixon, speaking at the annual Lancaster County Crops and Soils Days on Tuesday at the Farm and Home Center, put at least some of those fears to rest.

"We know that we've got to abide by the federal law," Nixon told the more than 300 farmers in attendance. "We think we've developed a program that meets federal requirements, but does so with a minimum amount of disruption for the people like farmers who are now pesticide users."

The Ag Department's program calls for licensing users of restricted pesticides, but doesn't require any license for farmers and others who use chemicals whose use is not restricted. The only requirements for restricted chemical use will be those which appear on the container labels, Nixon pointed out.

"But I would recommend to all farmers that they apply for a license to use the restricted pesticides," Nixon said. "You may run into a problem where the unrestricted chemicals aren't going to do the job you need done. Getting a license isn't going to be difficult at

Getting Their Farm By Bits And Pieces

"Okay," Bruce Andrien said to his then 10-year-old daughter Denise, "you can get a cow for your 4-H project. But when she has a calf and she starts giving milk, we might keep the calf, but we're for sure going to sell the cow. We are not going to start milking cows."

Today, five years later, the Andriens have 14 Registered Jersey cows and heifers, four Registered Jersey bulls and "one pink-nosed Guernsey," as Andrien puts it. The Andrien family - Bruce, his wife Loraine and their three children, Denise, 15, Bruce, Jr., 12, and 8-year-old Lorin - are now milking seven cows - with three more due to freshen - and hoping they can find a reasonably priced farm in the near future. The Andriens have been bitten hard by the farming bug. And at 39, Bruce Andrien is trying to build a whole new way of life for himself and his family.

"I want to farm," he said when Lancaster Farming visited the family on Monday, "because it's something the whole family can do together."

Andrun is a home improvement contractor in Chester County. The family lives on a wooded 13 acres outside West Chester. Behind the house which was built when they moved there some seven years ago, Andrien has constructed a barn and an exercise yard for the cows, two horses, a Shetland pony, and half-a-dozen Holstein-Angus steers. A short distance from the barn is a laboriously cleared hillside which serves as pasture for a purebred Hereford steer and a Hereford cow. And behind the barn is a small chicken house with about 100 dual-purpose birds.

Andrien is becoming a farmer by bits and pieces, but says he's ready now to begin a full-time dairy operation as soon as he can find a suitable farm. "We've looked all over for farms, and we check out every farm we see advertised in Lan-

[Continued on Page 17]

Bruce and Loraine Andrien, West Chester, hope to see their family in a full-time dairy operation in the near future.

FFA Meats Contest

Winners in the annual FFA meats judging contest were recently announced by Gus Birchler, FFA advisor at Penn Manor High School and coordinator of the event.

First place honors went to the team representing Garden Spot High School which was comprised of Mike Hartman, Lavern Martin and Lewis Good. Manheim Central's team captured second place honors and included Tim Good, Dennis Kulp and Steve Hershey.

The top five individual judges for the event were Mike Hartman, Garden Spot; Rick Hunt, Penn Manor; Dennis Kulp, Manheim Central; Clifford Martin, Ephrata and Steve Hershey Manheim.

The judging contest was held at the Kunzler Packing Company in Lancaster with Jim Heth organizing the competition. FFA members participating were asked to identify 25 cuts of meat and judge 5 beef carcasses for yield and grade. They were also asked to judge fresh hams and ribs for quality.

Sally Ann Garber, daughter of Mr. and Mrs. Lester Garber, Elizabethtown, models one of her award winning garments.

Award Winning 4-H Sewing Member

Sally Ann Garber, 737 Groff Ave., Elizabethtown, has been an active 4-H member in home economics for the past four years. As a member of the Sew & Sews Sewing Club in Elizabethtown, Sally has completed many projects that have ranged from making a scarf her first year to creative work with fabrics.

The Elizabethtown Area High School junior has been in several 4-H Dress Revues on the county, district and state levels often winning top prizes for her sewing creations.

As an exhibitor at the Farm Show, Sally Ann has had two sweepstakes awards in the sewing competition. At the State Farm Show, the sewing competitors are divided into districts according to the counties they represent. Winners are selected from the districts and those winners are then entered in the sweepstakes contest representing the best sewing creations in the state. Sally Ann has won a second in the sweepstakes for a school dress she constructed and captured first place in the Farm Show Sweepstakes category this year with her entry.

Sally Ann's award winning entry was a long-sleeved came knit dress with a contrasting imitation leopard fur vest.

Sally Ann explained that she had become interested in sewing since her mother had been in 4-H also and had sewn for some time.

Along with her sewing work in 4-H, Sally Ann has served on the dress revue committee and has attended

NEST RUN EGGS

Prices are from Egg Clearinghouse, Inc., (ECI) Durham, N.H. and reflect trading prices for gradeable nest run eggs. (GNR) on ECI, a nationwide trading center for producers, packers and marketers. GNR eggs are classified by weight in 30-dozen cases, and traded in lots of either 300 or 750 cases. Prices are FOB buyers dock, and are computed Tuesday and Thursday of each week. This week's prices for each classification were:

Classification	New Weight Per Case	Wednesday	Friday
Extra Large	51 lbs.	0	0
Class 1 - Large	48 lbs.	47	44
Class 3 - Medium	42 lbs.	44	41
Class 4 - Small	39 lbs.	35	33
Breaking Stock	48 lbs.	39	38
Checks	48 lbs.	30	29

New York Dressed Meats

February 20

Daily distributive - less than carlot meat trade.

Compared with Wednesday: General market tone carrying pronounced weakness for all fresh meat classes. Quotations carried mostly nominal for beef, veal, calf, lamb and pork cuts.

Beef chucks, pork butts and hams along with front ends veal and calf moving best but general outlet for lamb very poor. Purchasing power holding conservative particularly in volume channels of outlet.

Steer Beef

Prime 600-900 lbs. 61.50-63.50; Choice 600-700 61.00-63.50; 700-800 60.50-62.50; 800-900 59.00-61.00; Good 500-800 56.50-58.00.

Veal (Skin Off)

Choice 90-150 lbs. 81.00-87.00; Good 60-90 72.00-76.00; Standard 60-120 60.00-65.00.

Lamb

Choice & Prime 30-55 88.00-89.00; 55-65 85.00-87.00.

Choice Beef Cuts

Hinds (Steer) 145-190 lbs. 74.00-76.00; Arm Chucks 90-105 55.00-58.00; Ribs (7-rib) 34-40 70.00-75.00; Loins (Trmd) 50-70 85.00-90.00; Rounds (Steer) 70-95 73.00-75.00; Full plates 36.00-37.00; Hinds (Heifer) 120-170 73.00-75.00.

Live Poultry Report
Wednesday, Feb. 19

Prices steady on lgt type hens. Offerings adequate to barely adequate for fair needs. Offerings of heavy type hens barely adequate for a lgt interest.

Prices paid at farm: light type hens 4-5½ mostly 5-5½ in Pa., mostly 5-5½ in N.J.; heavy type hens TFEWR.

Delmarva

Broiler-Fryer Market
Wednesday, Feb. 19

Ready to cook movement continues light and unaggressive despite lower asking prices. Slaughter schedules curtailed as occasional plant not operating today. Today's less than trucklot asking prices lower on both plant and US Grade A. Live supplies ample though weights in a wide range. Undertone unsettleed.

Negotiated trucklot prices 2-3 lb. ready to cook broiler-fryers for delivery - next week:

Plant Grade 39-40.

Current Broiler-Fryer negotiated prices for immediate delivery mostly multiple-drop shipments to New York City from Delmarva.

Range: US Grade A 43-45; Plant Grade 42-44; Premium US Grade A 45-49; Premium Plant Grade 44-47; Wtd avg.: US Grade A 43.80; Plant Grade 42.70; Premium US Grade A 46.57; Premium Plant Grade 46.21.

Baltimore Eggs

Wednesday, Feb. 19

Market unsettled to weak. Demand spotty with only limited feature activity on large. Supplies are ample.

Cartoned eggs: Prices to retailers, state graded (Min one case sale) white. Grade A Large 64-70, Mostly 64-66; Grade A Medium 60-66, Mostly 60-62.

THE OLD FARMER'S ALMANAC

FEB. 24 - MARCH 2, 1975

Winter, still we see many charms in thee.

Timber cut now is less subject to decay . . . Last survivor of the Boston Tea Party died Feb. 24, 1852 . . . Full moon Feb. 25 . . . Post seized by Indians at Wounded Knee Feb. 27, 1973 . . . Average length of days for week, 11 hours, 6 minutes . . . Ludlow, Conn. (15,777 acres) was purchased for $60 Feb. 26, 1640 . . . Dinoflagellates turned Florida tides red Feb. 26, 1950 . . . Forget others' faults by remembering your own.

Ask the Old Farmer: When I was a boy, I used to hear the expression "asleep at the switch," meaning someone who was lax in his duties. Do you have any idea where the saying originated? O. M., Little Rock.

This is old railroad jargon — a switchman had to open and close switches, in a railroad yard, for example, and if he wasn't on the job, a lot happened to wake him up.

Home Hints: For a wonderful pincushion, cover a ball of steel wool with a bright scrap of material. It sharpens your needles and pins.

OLD FARMER'S WEATHER FORECASTS

New England: Most of week stormy with 20" snow in mountains and rain in southern region; clear and very warm by weekend.

Greater New York-New Jersey: Light rain to start, then clearing mild; rain, heavy at times, latter part.

Middle Atlantic Coastal: Early week very warm with some rain, then clearing and cooler; end of week heavy rain and mild.

Southeast Coastal-Piedmont: Cool at first, then warmer with rain; heavy rain inland and north latter part.

Florida: Fair and warm through midweek, then rain, heavy in northwest; clear and cool by weekend.

Upstate & Western N.Y.-Toronto & Montreal: Week begins with heavy snowstorm in north, then heavy rain and snow in south; clear and mild latter part, but rainy by weekend.

Greater Ohio Valley: Some rain to start, then sunny and cool; rainy and cool latter part.

Deep South: First part of week rainy in north and central with possible dust storm in west; end of week fair and warm.

Chicago & Southern Great Lakes: Heavy rain in east at first, then cloudy and cool, rain latter part and mild.

Northern Great Plains-Great Lakes: Mostly mild all week with late week snow and sleet in south central regions.

Central Great Plains: Showers to start, then clearing, then rain in south and east with heavy snow in northwest; clearing and warmer by weekend.

Texas-Oklahoma: Fair at first, then showers and possible dust storm in northwest; clearing and warm latter part.

Rocky Mountain Region: Week begins pleasant, then rain or possible snow in north and central; late week showers in north and central, warm in south.

Southwest Desert: Sunny and warm in west to start, then cold in east; end of week clear and hot in west, warm in east.

Pacific Northwest: Moderately heavy rain most of week and heavy snow in mountains; clearing by weekend.

California: Light rain at first, then clearing and warm; end of week clear and warm in south and mild in north.

(All Rights Reserved Yankee Inc., Dublin, N H. 03444)

CUCUMBER FARMERS

WANTED

TO GROW CUCUMBERS

We will have a public meeting of all interested farmers on Thursday, March 6

WATCH FOR FULL DETAILS ON TIME AND PLACE IN NEXT WEEK'S ISSUE.

If you are interested in contract growing cucumbers, and-or tomatoes, and-or several varieties of peppers, Please write to

BROWN & LANGER INC.
68 Gansevoort Street
New York City, N.Y. 10014

We are interested in having one or two men act as our paid agent To grade the cucumbers, and act as our shipper. Please contact us as soon as possible

Leesport Livestock Auction

Leesport, Pa.
Feb. 19, 1975

Good and Choice 360-825 lbs. feeder steers 29.00-31.00, lot at 33.50, Good 410-925 lbs. 27.00-29.25, Medium and Good 225-785 lbs. 21.50-26.00. Medium and Good 340-650 lbs. feeder heifers 24.00-30.50. Good and Choice 315-675 lbs. feeder bulls 25.60-29.00, Common and Medium 265-790 lbs. 19.00-22.25.

CALVES 174. Few Choice vealers 52.00-55.00, few Good 48.00-53.50, Standard 33.50-45.00, Utility 90-115 lbs. 20.00-28.00, few 115-130 lbs. 28.00-34.00, 70-85 lbs. 18.00-20.00. Farm calves: Holstein bulls 90-130 lbs. 25.00-38.00, few Beef cross bulls and heifers 90-110 lbs. 23.50-33.00.

HOGS 289. US No. 1-2 200-240 lbs. barrows and gilts 41.10-42.25, No. 1-3 195-240 lbs. 39.85-41.35, No. 2-3 190-250 lbs. 39.50-40.50, lot to 39.00, few No. 2-4 260-370 lbs. 34.00-37.75. US No. 1-3 250-465 lbs. sows 34.50-38.25, No. 2-3 380-585 lbs. 31.25-35.75, few Utility 250-395 lbs. 25.00-32.00. Boars 25.00-27.50, few light wieghts 29.75-38.00.

FEEDER PIGS 81. Two lots US No. 1-3 60 and 75 lbs. feeder pigs 29.50 and 38.00 per head, lot No. 1-3 30 lbs. at 13.00, No. 1-3 40-50 lbs. 26.50-33.00, lot No. 1-3 75 lbs. at 25.00 per head.

SHEEP 11. Couple Good 80 lbs. wooled slaughter lambs 27.50 and 30.00, couple Utility 75 lbs. 25.00-28.00. Few slaughter ewes 5.00-16.00.

Local Grain

Thursday, February 20

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, February 20, 1975 are as follows:

	Bid+		Offered+
Ear Corn			
New	61.00		69.00
Old	——		——
Shelled Corn	2.94	-	3.24
Oats			
Local	1.83		2.01
Western	——		2.18
Barley	2.40		2.67
Wheat			
Feed	3.31		3.47
Millers	3.30		——

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Omaha Cattle

Feb. 20
Weekly 51

CATTLE: Compared with the previous week's close: Prices on slaughter steers and heifers stood 1.00-1.25 higher through midweek with closing trade 50-75 higher in limited trading. Cows were 2.00-3.00 lower, some thin canner 3.50 off. Bulls were fully steady.

Four day receipts 19,300 as compared 22,700 previous week and 17,400 a year ago. Steers approximately 47 pct. week's total, heifers 30 pct, cows 13 pct. and feeders for auction 8 pct.

STEERS: A load high-choice and prime, clean 1190 lbs. yield grade 3-4 37.00, load choice and prime 1139 lbs. yield grade 3-4 36.25. Choice 975-1325 lbs. yield grade 2-4 34.50-36.00 at midweek, closing sales 34.00-35.25, part loads high-choice 35.50-35.75. During week, few loads choice 1350-1524 lbs. yield grade 3-5 32.00-34.50. Mixed good and choice 950-1250 lbs. 33.25-34.00 late, some mostly choice but quite muddy 33.50-33.75. Good 29.50-33.50, yield grade 2-3 Holsteins 30.00-30.35 at midweek. Standard and low-good 28.50-30.00.

Average cost slaughter steers first three days 34.35 average weight 1118 lbs. as compared 33.71 and 1117 lbs. previous week and 45.60 and 1158 lbs. a year ago.

HEIFERS: Load and part loads choice and prime 1000-1034 lbs. yield grade 3-4 35.50 at midweek. Several loads same grade 975-1025 lbs. 35.00-35.10. Choice 850-1050 lbs. yield grade 2-4 33.50-35.00 at midweek limited late sales 33.00-33.75. Mixed good and choice 750-1000 lbs. 32.00-33.00 late. Good 28.50-32.00. Small lots standard and good 27.00-28.00.

COWS: Utility and commercial 16.00-18.00, latter price sparingly. Canner and cutter 10.50-16.00, mixed cutter and low-utility 16.25-16.50. Shelly canner 8.00-10.00, some extremely thin 7.00.

BULLS: Yield grade 1&2 1400-2000 lbs. 20.00-23.00, few yield grade 1.

Ventilation Important

Before lighting a fire in your fireplace, make sure the room is well-ventilated, the damper open and the flue unplugged Poor ventilation makes the fireplace pour smoke into the room, remind Extension foresters at The Pennsylvania State University.

Although practicing the violin takes up much of Sally Ann's free time the Elizabethtown junior feels it is quite worth the effort.

Sewing Member

[Continued From Page 1]

the Leadership Congress held at Penn State.

While creating one's own fashions may be time consuming, Sally Ann has another interest which also demands much of her time and that is her interest in music.

Already Sally Ann is an accomplished musician and plays the violin and piano with disciplined skill.

When asked how she had become interested in music, Sally Ann responded by saying, "when I was in third grade they asked who would like to learn to play a musical instrument."

"I decided I wanted to play the violin and came home and told my parents what I had decided."

At first Sally's parents weren't sure that a violin would be the ideal instrument however Sally Ann soon displayed her skills and the apprehension was quieted.

Since that time, Sally has been actively involved with music and is a member of the band and school orchestra along with singing in the senior high school chorus.

Further interest has also lead Sally Ann to become a member of the Elizabethtown College Orchestra and the Lancaster Youth Symphony.

The young lady's talents are well known to the area as she has been asked to play at several of the community churches as well as playing at her own church the First Church of God in Elizabethtown.

Sally Ann has used her musical talents at 4-H functions as well as she won first place in recent county 4-H talent contest and later played at the 4-H banquet.

For her outstanding talents, Sally Ann has been selected to receive a scholarship to attend the Elizabethtown Summer Music Camp from the County Musical Arts Society. Being a scholarship winner, she will be performing a concert for the Society in May.

Both of Sally Ann's interests have kept her quite busy although she admitted that her work is enjoyable.

"It takes discipline to stay inside and work when the other young people of the neighborhood are outside."

Sally Ann explained that although she often works over 14 hours a week just on her music, it has taught her a sense of responsibility and self-discipline.

The Lancaster County Miss isn't quite sure what her plans for the future will be, however she would like to continue her work in music either in the performing or teaching field. And although much of her time may be spent in practicing, Sally Ann will no doubt still use her skills learned in 4-H sewing to provide herself with an original wardrobe.

Garden Spot Adult Farmer Farm Finance Meeting Set

The Adult Farmer Program being held at the Hinkletown Alternative School will sponsor a program on farm credit on Wednesday evening, February 26. Representatives of three local lending institutions will form a panel to discuss current thinking in the field of farm credit.

Speakers for the evening will be: Harry Hoffman, and Will Weber of New Holland Farmers National Bank. Raymond Baxter and Charles Halsey of the Blue Ball Bank, and Ronald Bard from the Production Credit Association.

The meeting will start at 7:30 p.m. on Wednesday evening, February 26, at the Hinkletown Alternative School. The school is located approximately one-half mile north of Route 322 on Wanner Road just east of Hinkletown. Interested persons are invited to attend.

Two weeks later on March 12, a representative from the Internal Revenue Service will present a program on Farm Taxes.

Letters to the Editor

Editor:

It was with great interest that I read your column, "Railroad Situation Becoming Bleaker" in "*Lancaster Farming*" Saturday, Feburary 8. Your excellent editorial points out many of the reasons that I introduced Senate Bill 52, the Rail Freight Rescue Act, in the Senate on February 1. I am particularly cognizant of the fact that rail freight service is absolutely essential to the agricultural industries of central Pennsylvania including the counties I represent in the State Senate.

The purpose of the Rail Freight Rescue Act is to provide a state agency which will formulate a plan to save rail freight service and also provide funds to help local initiative in saving freight lines. As you know, the National Rail Reorganization Act of 1973 provides grants of 70 percent where the states put up 30 per cent. The purpose of my bill is to provide that state funding for Pennsylvania. No such program now exists at the state level and I believe that the passage of this bill is, therefore, very important.

You will also be interested to know that Donald Parke, Executive Vice President at PennAg Industries, is familiar with the bill and supports it.

I read your newspaper regularly and find it most informative.

Franklin L. Kury
State Senator

Four Patz dealers were honored with trips to Disney World at their recent Mason-Dixon district meeting held in Mechanicsburg. Dealers from (left to right) are Roger Roop, Union Bridge, Md.; Marvin Horst, Lebanon; George Heath, district manager; Phillip Pinder, Kennedyville, Md.; and Roy Hutchins receiving the award for Walter Webster, Street, Md.

Week-end Woodsmen prefer HOMELITE® Chain Saws

You can take care of every out door woodcutting job. Clean up storm damage, cut down dead or unwanted trees, prune and limb, clear brush and saplings. If you've priced a cord or firewood lately, you'll realize how much money you can save with a Homelite chain saw.

Come in this week, we'd be happy to demonstrate one of the new fast-cutting, versatile Homelite chain saws.
Prices start at $119.95.

$25.00 WORTH OF FREE ACCESSORIES

With the purchase of any New Homelite Chain Saw in stock, during our Open House March 6, 7, 8, - 1975.
(Limited Supply)

Patz Dealers Honored

The Annual Dealership meeting of the Mason-Dixon Patz organization was held recently at the Penn Ram Motor Inn near Mechanicsburg, Pa.

Over 34 dealers attended the event from areas in southeastern Pa. and northern Maryland.

Keynote speaker for the meeting was John Walker from the Patz main office in Pound, Wisconsin. Walker spoke on the new 98 B Patz Silo unloader.

Also speaking at the meeting was Richard Bennett, a district manager from New York. Bennett's topic included a discussion on dealer training.

Awards were presented to six top dealers of the year within the Mason-Dixon district. They were Marvin Horst, Lebanon; Walter Webster, Street, Md.; Philip Pinder, Kennedyville Md.; Roger Roop, Union Bridge, Md.; Gerald Puffenberger, Hagerstown, Md.; and Landis and Esbenshade of Kirkwood, Pa.

Bonus checks for outstanding salesmanship were presented to those gentlemen previously listed along with Lloyd Sultzbaugh, Camp Hill; Roy Bentz, Bedford; Herbert King, Allensville; Richard McCarty, Forksville; Thomas Hetz, Lonacorning, Md.; and Harold Lucas, Bellefonte.

George Heath, representing the Patz Company, presented four salesmen with additional awards which represented trips for two to Disney World in Florida. Receiving the special award were: Roger Roop, Marvin Horst, Phillip Pinder and Walter Webster.

The Patz organization manufactures farm handling equipment.

Untangling USDA's Cow, Production Figures

A month ago, USDA's Crop Reporting Board estimated U.S. milk production for 1974 at 114.9 billion lbs., down seven-tenths of 1 pct. from the 115.6 billion lb. total for 1973. It also estimated the nation's total of milk cows on farms averaged 11,161,000 and that production per cow had averaged 10,291 lbs. for the year.

But, with the issuance of the Jan. 1 cattle inventory earlier this month, the Statistical Reporting Service found itself having to readjust all of those figures. It found that milk cow numbers averaged 11,221,000; that milk production for 1974 totaled 115.4 billion lbs., slightly above an also readjusted 1973 total of 115.385 billion lb. total. Production per cow was readjusted to 10,286 lbs.

Now, in the process, it readjusted each of the monthly milk production totals for 1974 upward, readjusted those for 1973 downward. The same for monthly cow numbers and production per cow.

Confusing? Okay, here's the January 1975 totals released last week. They show milk production at 9.3 billion lbs. for the month. That's slightly above the 9.29 billion lbs. (readjusted) from a year ago. Cow numbers are estimated at 11,204,000 for January. That's down slightly from the 11,212,000 total now estimated for December for December, but above the 11,105,000 estimate for December in last month's report.

Meat Imports Off Sharply

U.S. meat imports off sharply last year. At 1.079 billion (1 billion, 79 million) lbs., those covered by the Meat Import Law (mainly fresh and frozen beef and veal) were down 20 pct. from 1973 and the lowest since 1968. Over-all meat imports (those covered by the Meat Import Law, plus canned and preserved beef and veal, all pork and lamb and mutton) totaled 2.142 billion (2 billion, 142 million) lbs., down 17 pct. from a year earlier and the lowest since 1968.

Figures in the February issue of USDA's Livestock & Meat Situation were quoted on a carcass weight basis.

Beef Consumption Hits All-Time High

Despite all that talk about beef prices, U.S. consumers ate a record amount of it last year. USDA reported last week that per capita beef consumption in 1974 jumped to 116.3 lbs. That's up from 109.6 lbs., in 1973 and two-tenths of a pound above the previous record (of 116.1 lbs.) set in 1972.

Over-all red meat consumption hit 187.0 lbs. per capita, up from 175.7 lbs. in 1973 and third highest on record. Which means it's still below the 191.8 lbs. record total in 1971 and the 189 0 lbs. total for 1972.

Veal consumption moved up from 1 8 lbs. per person in 1973 to 2.3 lbs last year, the highest since 1971; pork, from 61.6 lbs. in 1973 to 66.0 lbs. last year; lamb and mutton dropped from 2.7 lbs. in 1973 to 2.4 lbs. last year.

Potato Stocks Soar

Stocks of potatoes for all uses held by growers, dealers and processors in fall production areas on Feb. 1 totaled a record 130.7 million hundredweight. That's up 23 pct. from a year earlier, 5 pct. above the previous record high Feb. 1 holdings of 1971.

'74 Farm Exports At $22 Billion

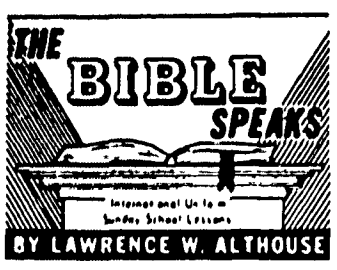
There's a typo on USDA's Cattle of Feed report issued last week. Ignore that 6,369,000 total quoted on page 1 in the report. Check page 2, which gives the Feb 1 cattle on feed total for 7 States at 6,050,000 head (the 6,369,000 total was from Jan 1)

The 6,050,000 figure for Feb 1 is down 37 pct from a year earlier. A further check shows January placements in those 7 States (Ariz, Calif., Colo., Iowa, Kans, Nebr and Texas) totaled only 1,139,000 head, down 42 pct from a year earlier

Feb. 1 Cattle on Feed Down 37 pct.

U S farm exports for calendar 1974 hit $22 billion. That's up 25 pct from the previous high (of $17.7 billion) set a year earlier

Reasons for the gain Higher prices that more than offset lower export volume; sharply higher grain, oilseed exports Though volume was off 6 pct, value per unit increased one-third from a year earlier Thus, while grain exports were off in volume, the value of those exports increased one-third to $5 7 billion



SAVED BY HOPE

Lesson for February 23, 1975

Background Scripture: Romans 5:1-5; 8:18-30; 1 Thessalonians 1:1-3; 1 John 3:1-3; Revelation 21:1-7.

Devotional Reading: Romans 8:31-39.

Psychiatrist Viktor Frankl observed in a Nazi concentration camp that often the key to survival was to be found in the prisoner's hope or lack of hope. If hope was destroyed in the prisoner, death was soon likely to follow.

Another illustration was given to me by a prominent cancer expert. A patient with a cancer that was diagnosed as terminal was put on a new drug that was unproven in its results. The patient, however, believed in the drug and began to improve rapidly. Soon, he was able to leave the hospital and he seemed amazingly on the road to recovery.

In This Hope

After he had enjoyed several months of appearent good health, a report appeared in the newspapers casting doubt on the validity of the drug. Within a few weeks, some of his old symptoms reappeared and it wasn't long before he was back in the hospital and his case looked hopeless once again. Back in the hospital, however, the physicians persuaded him to disregard the reports and try the drug again. This he did and soon he was out of the hospital again, apparently recovered.

When he had resumed his normal life again and enjoyed several months of good health, the U.S. government released and published a report that indicated that the drug had been proven worthless in the cure of cancer. Soon after reading this report, the man returned to the hospital and died.

So long as he clung to it, he was saved by his hope. Whether or not the drug was actually effective in dealing with cancer, his hope mobilized the cancer-fighting resources of his own body and, for a time, prevailed. Only when he lost his hope did his situation become truly hopeless.

Someone has said that there are no hopeless situations, only people who have grown hopeless about them. What this means is that hope is not to be dependent upon external conditions, but inner realities. What is really important is, not what happens to us, but how we respond to what happens to us. The source of our hope is always something inside us, not outside us.

No Comparison

For example, the situation in which we find ourselves may seem hopeless. No matter where we look there is nothing but discouragement. This is not something imagined, but real. The situation in which we find ourselves is really a bad one! Yet, no matter how bad the situation may be, there is always a reality that can overshadow the gloomiest prospects. As Paul puts it: "I consider that the sufferings of the present time are not worth comparing with the glory that is to be revealed to us" (Romans 8:18).

The source of our hope, thus, is never to be found in what we find about us, but in "sharing the glory of God" (Romans 5:2). Greater than any hardship we may know in the present is the great gift that God has promised us beyond the present circumstances. Therefore, we can take hope in the midst of our bad times because we are confident of the garce that God has in store for us.

By looking ahead to what God has prepared for us, we can, in a sense, have a foretaste of the fulfillment of our hope in the future, and find the strength to prevail amidst the trails of the present. It is thus that we are saved by our hope.

NOW IS THE TIME...

To Plan For Tree Planting

The early spring months of March and April are excellent times to plant trees of nearly all varieties. Everyone seems to be interested in the environment and the effort to have pure air to breathe and pure water to drink. An abundance of trees in the country and in each community will help accomplish both of the objectives. If mature or diseased trees have to be cut down, then young trees should be planted to replace them. Waste land can well be planted to many kinds of evergreen trees and contribute to a better environment. Shade trees about the home or farm homestead are very beneficial, and should be a vital part of any rural or surburban landscape.

To Practice Sanitation

At a recent livestock meeting Dr. Sam Guss from Penn State was reviewing some of the important practices in the raising of livestock. He emphasized the importance of having newborn animals arrive into a clean, sanitary area. This may be inside buildings or out on the ground, such as good pasture. Little animals should be handled similar to new-born babies the less exposure there is to filth and disease, the better it is for them. Special care and preparing for the arrival of new animals will help increase the percentage raised. Don't expect Mother Nature to do everything.

To Broadcast Legumes

Some alfalfa and red clover producers are making plants to broadcast the seed on top of their winter wheat fields. This may be done from late February until mid-March. The objective should be to broadcast the seed on the open ground while there is alternate freezing and thawing of the topsoil; this will work the small seeds into the ground. In recent years, many growers will wait until the topsoil becomes dry enough to use a drill and then band-seed the legumes; this is a better practice than broadcasting. However, some growers may not have the needed equipment. If broadcasting is to be done in winter grain, it should be done within the next month.

To Make Plans To Topdress Wheat

The application of a nitrogen fertilizer on winter wheat fields during early to mid-March is a good practice for most farms. This extra nitrogen stimulates growth and increases yields. However, if the fertility level is very high and lodging has been a problem, then smaller amounts should be used. Also, wheat fields that are to be seeded down to alfalfa or clover, should get smaller amounts. The rate of nitrogen application per acre will range from 25 to 60 pounds depending upon these situations. Sand, gravel, or shale soils should get the heavier amounts. The time to make the topdressing is in March when vegetative growth is starting.

Farm Calendar

Saturday, Feb. 22

9:00 - 3:15 - Schuylkill Co. livestock management day, Penn State Schuylkill campus.

Monday, Feb. 24

7:30 p.m. - Twin Valley Young Adult Farmers arc welding class no. 1, vo-ag shop, Twin Valley H.S.

Manheim Young Farmers - first day of machinery reconditioning workshop.

Tuesday, Feb. 25

7:30 p.m. - Swine management meeting, Lancaster Farm and Home Center.

7:30 p.m. - Cedar Crest YF vs. FFA volleyball, Cedar Crest Middle School.

7:30 p.m. - Garden Tractor Pulling Club organizational meeting, Rough & Tumble grounds, Kinzers.

Wednesday, Feb. 26

9:00 a.m. - S.E. Pa. Soybean meeting, Bucks Co., Holiday Inn, Kulpsville. Take Lansdale interchange of Pa. Tpk.

10:00 a.m. - 3:00 p.m. - 4-H Club Leaders training meeting, Lancaster Farm and Home Center.

7:30 p.m. - Garden Spot Adult Farmer meeting on farm credit, Hinkletown Alternate School.

Thursday, Feb. 27

7:30 p.m. - E-Town Young Farmer poultry management meeting, vo-ag room, E-Town H.S.

7:45 p.m. - Chester Co. Corn Meeting, vo-ag room, Owen J. Roberts H.S. at Rts. 100 & 23.

DHIA workshop, Lancaster Farm and Home Center. Continues through Friday.

Monday, March 3

7:30 p.m. - Manheim Young Farmers monthly meeting.

Tuesday, March 4

9:30 - 3:30 - 1975 Livestock Day, Penn State

ED ESHLEMAN'S WASHINGTON REPORT

Rebates have become a popular way for business to reduce inventories in this recessionary period. The automobile companies started the rebate programs, but other industries seem to be picking up on the idea.

So far, the rebate procedure seems to be successful, partially, at least, because it benefits both manufacturers and consumers. When a company or a dealer is able to move previously unmoveable and expensive inventories, the program is a success from that perspective. And the customer is happy because he is getting back money on his purchase.

The long range effect of rebates hopefully will be an incentive to the overall economy to move forward. If people are buying, then perhaps the whole economic picture will brighten.

Though rebates seem to be a reasonable way for business to meet today's problem, they also seem to me a sign of something very wrong in our free enterprise system. Rebates are, in effect, a way of cutting the price of a product without really cutting the price even when the basic economic conditions dictate a permanent price reduction.

If our free enterprise system was working like it is supposed to work, the present downturn in economic affairs would be met by price cuts. Business faced with dropping sales would reduce prices to try to get their products moving again. And, they would not be talking about February 28 cut-off dates for saving the consumer money. Rather, the cuts in price would be across the board to get the customer back to buying throughout the year.

But business does not feel that it can make the permanent price reductions that would normally be expected under present circumstances. Why? Because all over Washington, the political liberals have been making noises about imposing price controls. The companies don't want to get caught with their prices down if price controls are passed by Congress. They don't want to get caught because they fear that the same liberals would not be willing to hold the line on the wage increases their labor allies would demand and could not hold the line on the price of foreign goods. Their fear of price controls is simply that if they lower prices, they will get frozen at a level that cannot be sustained when other costs begin to climb.

Therefore, business has adopted the temporary price cut mechanism and called it a rebate. But as nice as rebates are for a short time, they offered no long-term relief for the hard-pressed consumer nor long-term relief from inflation for the economy as a whole.

It is a shame, as far as I'm concerned, that Capitol Hill has thrown the economy so out of kilter that it cannot respond to changing economic patterns. And it raises the question of who the real friends of the consumer are. Are they liberals who have talked long and loud about their commitment to consumerism but whose policies end up denying all consumers reduced prices? Or are the consumer's real friends those who have tried to preserve the responsiveness of our free enterprise system?

INCREASE YIELDS $15.00 AN ACRE FOR 25¢

ORTHO ISOTOX® Seed Treater (F) is backed by the best kind of proof a corn seed-treater could have: over one hundred million successful corn acres. All kinds of climate. All types of soil. Rural Home Rebuilding Set

The Pennsylvania Agriculture Department's $375,000 project to rebuild rural homes in three counties will receive community guidance through the formaton of local committees, Agriculture Secretary Jim McHale said last week.

The one-year, federally funded Rural Housing Rehabilitation Program has been scheduled for Mifflin, Juniata and Snyder Counties. Under the program, isolated rural homes will be reconstructed with a labor force drawn from the target areas.

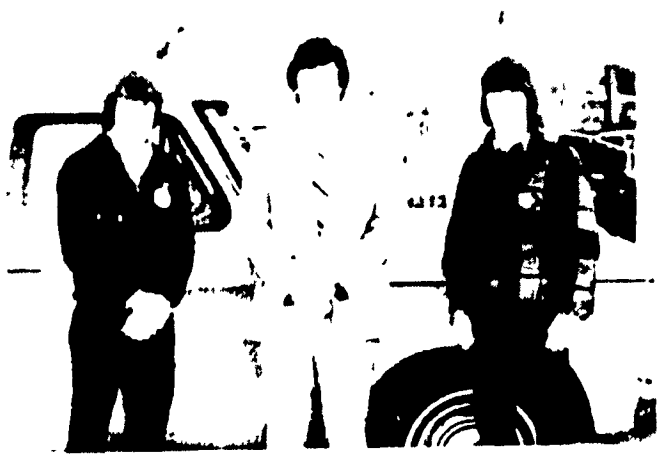
McHale said that letters have been sent to seven people in each of the three counties asking them to serve on a Program Review Committee for their county. The individuals are county commissioners, construction company executives, labor union representatives, farmers, ministers–"people whose occupations make them knowledgeable on employment and housing conditions in their areas," said McHale.

McHale said meetings have been scheduled this week with prospective review committee members to acquaint them with details of the project.

"We look forward to working with you," McHale wrote in his letter. "I am sure this program will assist in easing the unemployment within your area, provide manpower training for the unemployable, and will rehabilitate and revitalize many homes of the disadvantaged, handicapped, senior citizens and low-income people."

The project, to run through calendar year 1975, will begin with surveys, interview and cost estimates in various rural target areas in the three counties. The project is designed to employ the elderly, the handicapped who can perform some task, and youth from low-income families.

The one-year $375,000 grant for the pilot project derives from an allocation by the U.S. Department of Labor Manpower Administration under the Comprehensive Employment and Training Act of 1973.



Phillips' Ford of Manheim recently donated a 1975 Ford F150 Pick-up Truck to the Manheim Future Farmers of America Chapter to be used for one year for FFA events. Shown in the photo is Bob Hershey, Manheim FFA President; James Phillips, manager of Phillips' Ford; and J. Kevin Rohrer, FFA Vice-President.

- For Those Who Care Enough to Want the Very Best -

Some South American Indians believe that eclipses are caused by a huge jaguar attacking the sun and the moon.

Pesticides Predicted Available

First growers and other producers of agricultural products should not have any problems in purchasing and applying pesticides for their 1975 crops, Henry F. Nixon, director of the Agriculture Depart's Bureau of Plant Industry, told fruit growers at their recent annual meeting in Gettysburg.

Nixon emphasized that anyone buying restricted pesticides after October, 1976 has to be qualified to use them.

The Agriculture Department is responsible for administering and enforcing the Pennsylvania Pesticide Control Act of 1973.

Pesticide users will fall into two general classifications of private and commerical applicators.

Private applicators are farmers who apply restricted pesticides to their own land or land which they lease for farming. To qualify, the farmer must prove competence in the use of such pesticides by some type of examination and then be certified as a private applicator and assigned a permit number. He must present his permit number to a dealer to purchase a restricted pesticide.

Nixon described commercial applicators as those who engage in the business of applying pesticides classified for restricted use. They will be examined to prove competence in the specific categories of comerical applicators to which they belong. If a commercial applicator wants to be certified in several categories he may take the examination in as many categories as desired and one fee will cover all categories in which he is certified, explained Nixon.

The cooperative Extension Service of the Pennsylvania State University will be assisting the Department of Agriculture with the educational aspects of applicator certification.

A correspondence course will be available for private applicator certification. In addition, training programs and conferences will be available to assist those desiring to become commerical applicators. Specific times, places or dates are not yet available. The county Extension office will be the source of information on these programs. Such information will also be made available to the media.

Partnership Meeting Set

The Garden Spot Adult Program will present a study on DAIRY PARTNERSHIPS for interested area farmers on Tuesday, February 25, 1975 at 7:45 p.m. in the agriculture classroom of the Garden Spot High School. Topics to be explored will be the advantages of agreements (either written or unwritten) for father-son operations and other working family agreements along with partnerships with no family ties. The aforementioned will include details in an agreement and ideas of profit sharing, incentives and bonuses.

Featured speaker of the evening will be Mr. Jay Irwin, Lancaster County Associate Agent. Mr. Irwin has helped to plan many partnership agreements currently in existence in our area. Along with the presentation, sample copies of agreements will be available to you.

With the availability of farms decreasing in the future, especially in the Lancaster County area, more families will turn to partnerships for sustaining their lives on the farm. If you have a son or brother or are in need of a partner, it will definitely be to your advantage to attend this meeting.

Lebanon 4-Hers Receive Honors

Seven Lebanon County youths received awards at the County's Annual 4-H Livestock Banquet held Tuesday evening (Feb. 18) at the Schaefferstown Fire Hall.

Jay Bomgardner, Annville R3, captured four of the awards and was presented with trophies from various agribusiness firms in the area. Bomgardner, who had shown the grand champion steer in 4-H competition, received an award sponsored by Burkholder's Meat Market. The youth also received an award from Midway Mills for showing the grand champion hog at the county round-up. Two other awards found their way to Bomgardner as he also received trophies from Grubb Supply and Leann Yorkshires for exhibiting the champion buddy steer and being selected as the champion hog fitter respectively.

Tom Seaman, Grantville R1, received an award from the Evergreen Tractor Company for exhibiting the reserve grand champion steer along with capturing the champion hog showman title for which he was awarded a trophy sponsored by John Herr Feeds.

4-Hers who received awards at the recent Lebanon 4-H Livestock banquet are (from left): Jay Bomgardner, Annville R3; Bonnie Arnold, Lebanon; Tom Seaman, Grantville R1; Cindy Eberly, Newmanstown R1; Donald Bollinger, Myerstown R2; and Tom Arnold, Lebanon.

Both awards for the champion steer showman and fitter were presented to Jeff Heisey, a Lebanon youth. The trophies were sponsored by Keller Brothers and R & S Pallet Company.

In the livestock judging category, it was Donald Bollinger, Myerstown R2, who captured the award which was presented by Midway Mills. Bollinger also received an award from Walter Risser for his steer entry at the Farm Show.

Palmyra Feed and Grain Company and Umberger's Mill joined with the Risser farm to present Cindy Eberly, Newmanstown R1, and Jeff Heisey, Lebanon with awards similar to Bollinger's for their Farm Show steers.

Tom Arnold, a Lebanon youth, was presented with an award sponsored by Little Dutch Acres for having exhibited the reserve grand champion hog while his sister, Bonnie captured the trophy for exhibiting the farm show pair of hogs which was sponsored by the R & S Pallet Company.

Along with the banquet event, special entertainment was offered by William Beard, a hypnotist living in the Lebanon area.

Leaders for the Livestock Club include: Leon Arnold, J. Marlin Bollinger, Charles Bomgardner, Victor Bomgardner, Richard Kreider, Robert Miller and Christian Seaman.

Laundry Brighteners

Brighteners or fluorescent whiteners, used in laundry detergents, coat the fibers of a garment with a "colorless dyestuff" during washing to reduce yellowing in whites and to brighten colors. Mrs. Ruth Ann Wilson, Extension clothing and textiles specialist at The Pennsylvania State University, says they act by converting invisible ultraviolet radiation to visible light so the yellowness is masked. Light reflectance and brightness are increased. Optical substances enhance but do not take the place of good laundering procedures.

Youth Calendar

Tuesday, Feb. 25

7:30 p.m. - Thomasville 4-H Club will meet at the York 4-H Center near Bair. Program will be a spring-sing-up meeting for projects. Members and parents are urged to attend.

Wednesday, Feb. 26

7:30 p.m. - York County 4-H Officers Training meeting to be held at the 4-H Center near Bair.

Friday, Feb. 28

Meeting of the Conestoga Crusadors 4-H Horse Club at the home of Mrs. Nancy Jenkins.

Friday, March 7

Meeting of the Silver Spurs 4-H Horse Club at the home of Amy Katz, Lancaster.

Grassland FFA Banquet at the Garden Spot High School cafeteria beginning at 6:45 p.m.

Saturday, March 8

York County 4-H Fun Night and covered dish supper at the 4-H Center at 7:00 p.m.

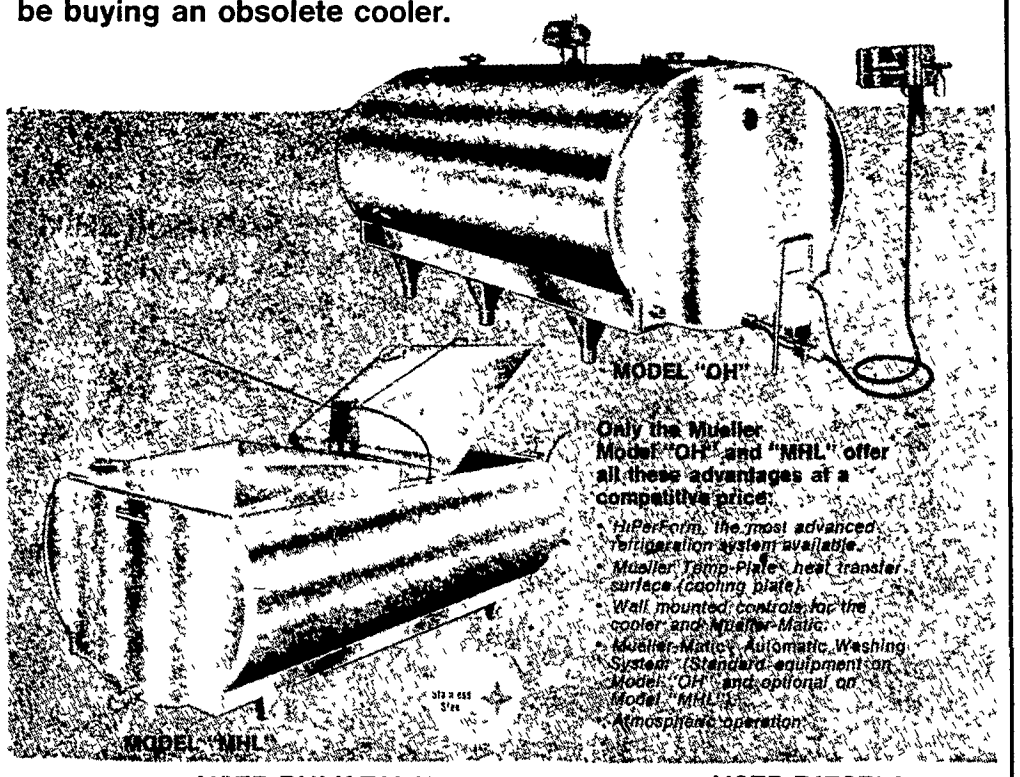
1250 OH HIPERFORM
The Mueller Models "OH" and "MHL" with HiPerForm make all other bulk milk coolers obsolete.
If you are in the market for a bulk milk cooler and you don't check all the advantages of the Mueller Models "OH" and "MHL," you may be buying an obsolete cooler.



Only the Mueller Model "OH" and "MHL" offer all these advantages at a competitive price:
- HiPerForm, the most advanced refrigeration system available.
- Mueller Temp-Plate heat transfer surface (cooling plate).
- Wall mounted controls for the cooler and Mueller-Matic.
- Mueller-Matic Automatic Washing System (Standard equipment on Model "OH" and optional on Model "MHL").
- Atmospheric operation.

New Machine Automates Broiler Coop Handling

SCENE: Receiving dock of a commerical poultry processing plant. Contaminated dust. Off odors. Heat, rain, or freezing winds, whatever the climate may offer.

SCENARIO: Eight to ten men are unloading trucks, tossing coops of live poultry onto conveyors which move the coops into the processing plant. Every hour workers manually move 1,000 75-pound coops - 12,000 chickens - to meet a quota.

What makes this a bad scene? Unhealthy human environment and bruised birds.

Improvement is on the way. A new chicken coop unstacking machine, the first component of a mechanized coop handling system, has been developed by agricultural engineer Albert D. Shackelford and engineering technician John Holladay at the Richard B. Russell Agricultural Research Center in Athens, Ga. Unlike some proposed semi-mechanical systems, the unit is expected to be adaptable to most processing semi-mechanical systems, the unit is expected to be adaptable to most processing operations. The Center is part of USDA's Agricultural Research Service.

In 1973, per capita consumption of chicken totaled 41.4 pounds including 37.7 pounds of broilers. Retail broiler sales totaled $5 billion. But before the country-fried chicken meets the mashed potatoes on the consumer's table, the live bird must be transported from broiler house to processing plant in coops stacked on live haul trucks.

Individual coops must be safely unstacked from coops stacked up to 11 high on the truck and then set on a conveyor. At an average of 12 birds per coop (10 per coop during hot summer months, up to 16 during cold winter months), a 6,000-bird-per-hour processing plant requires 500 coops of chicken per hour. Two workers may handle this load. The distances between the coop stacks on the truck and the conveyor are not great - 2 to 8 feet, depending on the location of the crates on the truck. The distance tempts workers to toss the coops onto the conveyor, bruising the chickens, perhaps causing them to be condemned, or at best, downgrading the dressed product. Coops dropped or thrown off the truck onto the conveyor are also damaged. Because of an inherently poor working environment and the heavy labor involved, workers are increasingly difficult to find and to keep. Both conditions constitute a serious major problem to the poultry processing industry; it must turn to mechanization and automation, researchers say.

The new unstacking machine works like this: A squeeze lift removes a stack of full crates from the haul truck and places it on a conveyor. The conveyor moves the load of crates to an elevator which raises the stack to the top of a tower. Then the top crate is picked up by a series of pneumatic tires and chains and transferred to a second conveyor which takes it to the area where the birds are to be removed and hung on the kill line.

A prototype of engineer Shackelford's design has been installed at a processing plant near Gainesville, Ga., for testing under commercial operating conditions. Based on test results, the unit is capable of handling 12,000 coops per hour with a labor saving potential of 3 to 4 workers. Bruising of live brids and damaging of coops are greatly reduced. Importantly, the equipment relieves employees of manual handling of coops.

A powered feed conveyor supplies stacks of standard 10-inch coops to the unstacking tower on demand. Controls on the unit supply one stack of coops into the tower and at the same time position another stack at the entrance for quick transfer to the tower. The coops are moved toward the tower by powered drag chains which travel the length of the conveyor.

An integral part of the unstacker is the tower conveyor; it positions a stack of coops on the lift platform. The lift platform, which supports and elevates a stack of coops, is raised and lowered by a powered ball bearing screw; it is driven by a 2-horsepower motor equipped with a fail-safe brake to stop the lift platform at control points. Total cycle time from bottom to top and return is less than 20 seconds.

"The unit is simple to construct, it's rugged and reliable even in a dusty atmosphere, and it is not costly or difficult to operate," said Mr. Shakelford. "It handles damaged crates and stacks that get out of alignment, plastic and wooden coops, and mixed stacks."

Are there any limitations? Mr. Shackelford finds no major ones. "The conveyor stores six stacks of six crates at present, if that is a limitation. But there's no reason to believe a longer conveyor or a higher tower couldn't be constructed to increase coop storage and production rates."

As late as the 18th century, some Spaniards supposed that copper grew in the ground and that if a mine was left alone, it would become productive again.

Rural Transportation Problems Continue

The 18-month long crisis in transporting agricultural commodities and farm supplies has subsided, notes a report released recently by the Committee on Agriculture and Forestry of the United States Sentate. However, certain problems will continue, unless changed are made.

The Committee Print, "Prelude to Legislation to Solve the Growing Crisis in Rural Transportation," contains two parts. The first, Transportation in Rural America, was prepared by the U.S. Department of Agriculture's Economic Research Service (ERS), at the request of Congress. The ERS study cites flexible pricing of rail services as one way to prevent future crises. Locating storage facilities for surplus food grains near ports could also help by preventing wide year-to-year variations in agricultural demands for domestic transportation services.

Private automobiles and small trucks will probably continue as the major means of travel for rural residents but some fairly inexpensive means exist for providing service to people who cannot afford vehicles. Although the quality of some rural highways has improved, many remain deficient, according to the study.

Conditions of rural roads, and potential for improvement, should be considered in decisions to abandon rail service in rural areas. Mass abandonment of unprofitable lines could cause economic hardship in some rural communities. But, analyses of conditions in the United States and Canada reported in the Committee Print suggested that grain marketing costs could be reduced by substantial rail abandonment, consolidation of elevators, and multiple car shipments.

Part II, Meeting Rural Transportation Needs, was prepared by the National Area Development Institute (KY), under contract for the Library of Congreee at the request of the Senate Committee on Agriculture and Forestry. Bearing out findings of the ERS study, Part II focuses primarily on attempts to handle problems in rural transportation through legislation. It further provides insights into rural people's major concerns and the relationship between rural development and transportation needs.

A single copy of "Prelude to Legislation to Solve the Growing Crisis in Rural Transportation" is available free on postcard (please include zipcode) or telephone (202-447-7255) request from the Publications Unit, Economic Research Service, Room 0054 - South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

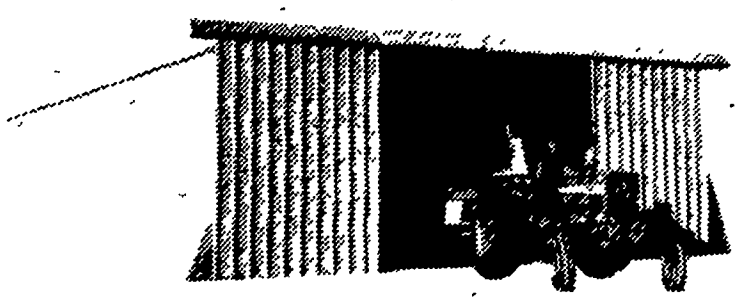
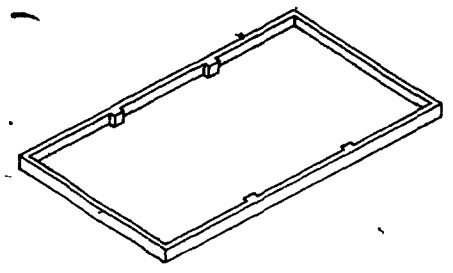
FREE CONCRETE



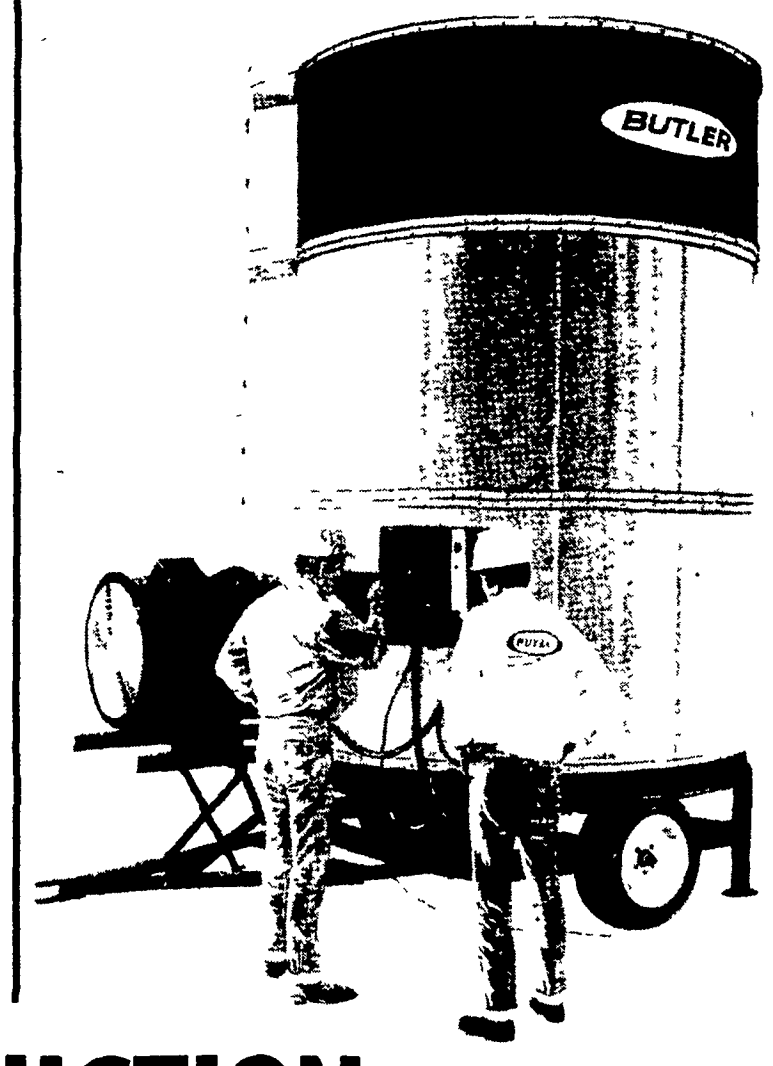
When You Buy Any Butler Farmsted® Building... For a Limited Time Only!



CURTAIN WALL

It's all yours. Free. Enough concrete for an 8" wide curtain wall foundation when you buy a Butler Farmsted® building. The amount of concrete furnished is limited to the amount specified in the Butler foundation drawings @ $26.75 per yard maximum. If you elect to pour a complete concrete floor, you'll be credited the amount of concrete required for the curtain wall foundation. All-Metal Farmsted is fire-resistant and termite-proof. Clear-span interior. No space-stealing rafters or trusses. Easily insulated. Complete accessories available. Offered in a variety of sizes. Adaptable to almost any farm or ranch use. Don't miss out on the free concrete. Offer expires midnight March 31, 1975.

BUTLER KAN-SUN BATCH DRYER



The Kan-Sun Batch Dryer is especially designed for

- the farmer whose daily harvest rate is under 2 100 bushels
- the farmer who is drying grain for the first time and wants to make a minimum dryer investment
- the feeder who raises limited amounts of grain and doesn t want to haul his grain to town for drying and haul it back for feed
- the farmer with separate field and storage locations the portable Kan-Sun Batch Dryer can be moved to the grain and to the storage
- the farmer who owns an in bin system such as Butler Stor N-Dry® and wants to increase his daily drying rate, he will use the Kan-Sun for drying and the bins as cooling and storage tanks (dryeration)

The Butler Kan-Sun Batch Dryer can remove 10 points of moisture from 90 bushels of corn an hour In a 24-hour drying day the total dried and cooled will be 2 100 bushels Using dryeration can increase drying capacity to 2 700 bushels

Pesticide Law

(Continued From Page 1)

all, so I think it's in your own best interests to get one."

Nixon pointed out that the state's program isn't official yet, but they've done just about all the preliminary work. The biggest hurdle yet to face is getting approval for the program from the U.S. Environmental Protection Agency. Nixon said he doesn't really anticipate any problems there.

Under the Pennsylvania program, chemicals would be classified according to their toxicity and residual properties with respect to animals and the environment. General use pesticides would have no restrictions except for those on the label. Restricted use materials could be bought and used only by certified applicators. There would be two basic kinds of certification, private and commercial.

So, according to Nixon, the farmer could operate without certification - a license, in other words - if he used only general use pesticides. But he would need a license for restricted materials.

"We've tried to make it as easy as possible for anyone to get a license to use restricted materials," Nixon said. "We've developed a correspondence course with Penn State. It will be available sometime in June, I hope, and it will cost about $6. The course explains pesticide use. After reading the course, you simply fill out an examination in your own home and mail it in to Penn State. If you pass, and practically all of you will, you'll be certified for restricted pesticides. It's as simple as that."

According to Nixon, the course has been tried out on several groups of farmers throughout the state, and of the farmers who have taken the course, some 95 percent have passed the test.

Farmers without licenses will not be able to purchase restricted pesticides from dealers, but they will be able to buy general use materials. Nixon added that restricted materials may also be sold by dealers to the wives, children and hired hands as long as they take the license with them to the store. This provision was made so that farmers busy with field work wouldn't have to leave their chores to run into town for spray materials.

Under the state's proposed setup, farmers would have to pay no fee for their private applicator's license, which would be good for three years. The license could be automatically renewed at the end of that time if the farmer demonstrated that he had undergone some sort of update training since he had first received his license.

That training, Nixon said, could consist of attending one county agent meeting having to do with pesticides, or attending a training session offered by a private company.

In addition to Nixon, the Crops and Soils Day audience heard from Dr. W. Wayne Hinish, Penn State extension agronomist, John Yocum, superintendent of Penn State's S.E. Field Research Lab at Landisville, and Dr. Willis McClellan, and Dr. Joe McGahen, both Penn State extension agronomists. The meeting was organized by Lancaster County associate agent Arnold Lueck.

Hinish talked to the group about the proper use of commercial fertilizers, lime, manure and soil testing. "When we're talking about 30-cent nitrogen," Hinish said, "we've got to know exactly what we have in the fields and we've got to know exactly what to use to correct any deficiencies. That's why you should get your soil tested, and why you should know exactly what kind of soil you're working with."

One of the big factors holding down yields in the area, Hinish feels, is a "rented - land - syndrome". Farmers who grow crops on rented land are afraid to spend any money on lime because the effects of lime are spread out over three years. "But if you have a field with a pH of 5.0 or thereabouts, you can't afford to grow corn. And if you do grow corn, you can't afford not to use lime. At a pH of 5.0, nitrogen efficiency is cut to 53-percent, which means you're just throwing away half the money you're spending on fertilizer. Lime is still a lot cheaper than fertilizer."

Yocum briefly discussed new developments in alfalfa, soybeans and tobacco. McClellan and McGahen talked about weed control and maximizing corn returns for 1975.

caster Farming," Andrien said. "I don't think we'll get anything in Chester County. In our area, West Bradford Township, just about all the farmers have been approached by developers who want to buy their farms. Just a few months ago, a farmer near here sold 33 acres for $250,000. You just can't pay that kind of money for a farm and expect to make enough from farming to pay off the mortgage."

Ten years ago in Bradford Township there were perhaps 40 milk shippers. Today there are only ten, and the Andriens, with their seven milking cows, are one of those.

How do you make any money with seven cows, we asked Andrien. "Well, we don't. The farming operation is in the red sometimes, and sometimes it's in the black. We've put about $20,000 into buildings, animals and equipment so far, and we're just about breaking even. We made some profit over the summer, but mostly because we were picking up prize money at fairs.

"Actually, the dairy operation would probably be self-sufficient right now, even with milk prices down, if it weren't for the freeloaders."

"You're not selling the horses!" Mrs. Andrien and the children said almost in unison. The horses are one of the things the Andriens like about living in the country. They also like making their own butter, eating eggs from their own chickens, drinking milk from their own cows, and eating beef from their own steers.

Denise, the 15-year-old daughter of Bruce and Loraine Andrien, was the catalyst who started the family on the road to farming.

"We even make our own fudge," Lorin said.

Both Bruce and Loraine Andrien are Chester County natives. Bruce grew up on his grandfather's 60-acre farm. Mrs. Andrien never lived on a farm but enjoyed visits to a relative's farm as a child. Many of those early experiences helped them to decide that they wanted to become a full-time farm family. That, and a daughter who wanted "just on cow".

Denise is now a frehsman at Downingtown Junior High School. She said she's always loved animals, and that she hopes to become a veterinarian. Denise is also responsible for that lone Guernsey in the Andrien herd. She's in love with Guernseys, she said. Why? "I like their eyes."

Denise and her two brothers are all members of the Tri-Community 4-H club.

But her father's in love with Jerseys. "When we do get a farm, I'd like to stick with purebred Jerseys. I like their temperment, especially with children in the barn. They're easy to control, and they seem more intelligent to me than the other breeds. And they take less feed and less work for the amount of milk you get."

Andrien now ships all his milk to the Lengachre cheese plant in Kinzers. This means all his output is sold at manufacturing milk prices, but Adrien said it's an inconvenience he'll put up with until he gets better milking facilities. Because he wasn't planning on doing any milking, the barn wasn't built for milking, Andrien explained. All the cows in the herd are enrolled in the DHIA testing program.

Farm Employment Up

For the first time in 20 years, farm employment in some areas, including Pennsylvania, is increasing, according to an economist with the College of Agriculture at The Pennsylvania State University.

"At least for the time being, hired farm employment in increasing as individual farms grow larger and the farm work force becomes more industrialized," declared Dr. James S. Holt in addressing members of the State Horticultural Association at their 116th annual meeting in Gettysburg.

It appears, he said, that the effects of mechanization and consolidation have run their course on farm employment. He is associate professor of agricultural economics at Penn State.

Hired farm employment declined steadily for over 20 years in Pennsylvania and reached a low level of about 16,000 workers in 1969, Dr. Holt reported. It remained stable at about that level through 1972, he added, and then increased by almost a third to 21,000 workers in 1974. Peak seasonal hired employment increased from a low of 26,000 workers in 1971 to 32,000 in 1974.

Relatively high levels of unemployment are predicted well into 1976, it was pointed out. This means, he said, the the supply of agricultural workers will be increased by non-farm people - at least during the next two growing seasons.

Increased unemployment, however, will not slow down appreciably the rise in farm wage rates, Dr. Holt affirmed. The average hourly farm wage rate rose 12 cents in 1974 to $2.11 an hour. A similar rise is likely in 1975, he predicted, due in part to the effects of the increased agricultural minimum wage.

From the standpoint of employment regulations, he said there is a strong trend toward eliminating special exemptions for agriculture. Arguments that removal of special exemptions for farm employment would eliminate some workers from the labor market are likely to fall on deaf ears during periods of high general employment, he noted.

Organizing efforts of workers will continue, Dr. Holt indicated. There is at least the possiblity of agricultural labor relations legislation being passed by Congress in the next 2 or 3 years, he added.

"Such legislation is bound to restrict the overall supply of workers and increase wage rates. At the same time, it may have some advantages to employers in regularising the farm labor market while improving the social status of farm work," he stated.

With increasing numbers of workers coming from non-farm and even non-rural areas, recruitment and training programs are ways employers and groups of employers might increase their labor supply, it was suggested. Even for unskilled work, training may be essential for workers without previous farm experience.

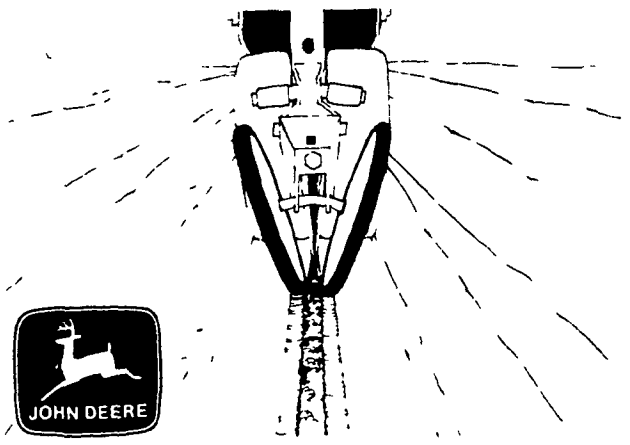
New Max-Emerge™ Planters firm soil around seed—not over it—for better emergence

Just one of our down-to-earth ideas to help you get a better crop a better crop stand



JOHN DEERE

New Max-Emerge Planters feature unique seed firming wheels They work by closing the seed trench from the sides, instead of compacting soil directly over the seed. Soil is well-firmed in the seed zone, but only loose soil is left for tender seedlings to break through New firming wheels require no covering attachments because the cover soil comes from the seed trench walls. Stop by soon for more details on new Max-Emerge Planters

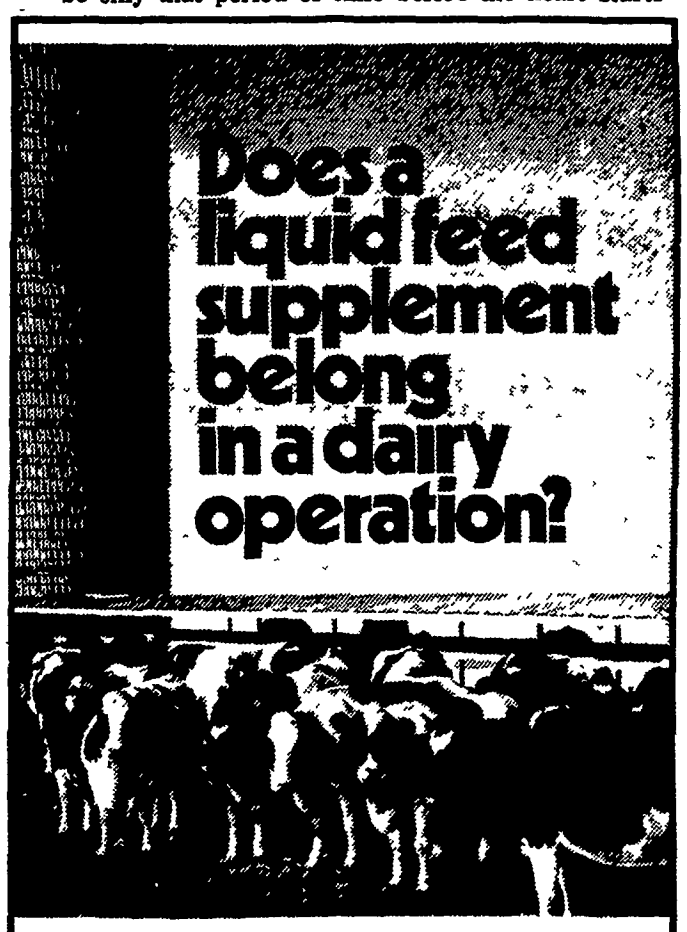
Eshleman Seeking Public Opinion

Congressman Ed Eshleman's annual questionnaire for constituents of the 16th District appears below. Residents are urged to fill out the form and return it to: Congressman Ed Eshleman, 2244 Rayburn House Office Building, Washington, D.C. 20515.

QUESTIONNAIRE

1. To conserve petroleum, do you favor: (Choose one)
   —— A. Mandatory rationing
   —— B. Raising the tax on gasoline only
   —— C. Raising the import tax so that all petroleum products go up in price.
2. If rationing was imposed, could you get by on the predicted allotment on nine gallons per week? YES—— NO——
3. To encourage the manufacture and use of smaller, more economical automobiles, would you favor a tax on new automobiles based on the number of miles-per-gallon the vehicle is capable of traveling? (I.E. automobiles that travel the fewest miles-per-gallon would be taxed the most; automobiles with the better gas mileage would not be taxed) YES—— NO——
4. Which of the following two economic programs most closely reflects your idea of what the nation needs: (Choose one)
   —— A. Try to hold the line on Federal deficits, no new spending programs, broad-based tax cuts, fuel tax increases, incentives to business to increase production and cash payments to low income people.
   —— B. Major new Federal spending programs, tax reductions aimed at lower income groups, fuel rationing, increased public service jobs, government financed aid to depressed industries and lower interest rates.
5. Legally, we have generally agreed that a person's life stops when the heart stops beating. Therefore, it is my feeling that life should be considered started, for purpose of law, when the heart starts beating. This occurs approximately 6-8 weeks into pregnancy, so would you agree that the legal limit on abortion should be only that period of time before the heart starts beating except in those cases where the life of the mother is endangered? YES—— NO——
6. A National Health Insurance Program:
   —— A. Is not needed.
   —— B. Should be operated and controlled completely by the Federal government (Approximate new cost to the government - $60 - billion)
   —— C. Should allow private insruance companies to continue to furnish policies but require the policies to meet Federal guidelines. There would be government aid for the poor. (Approximate new cost to the government - $9.3 billion)
   —— D. Should require employers to furnish all employees with a Health Insurance Policy that meets Federal guidelines with a government administered policy for the self-employed, employees of small businesses and the poor. (Approximate new cost to government - $6.5-billion)
   —— E. Should provide a plan to pay the costs of catastrophic illnesses only. (Approximate new cost to government - $4.4 billion)
7. Do you favor President Ford's proposed 5-percent limit on Social Security Benefit increases? YES—— NO——
8. There is widespread agreement that the Social Security system is facing future financial difficulties which will require more money. In order to raise that money do you favor:
   —— A. Higher Social Security withholding taxes
   —— B. Dipping into general tax revenues to supplement revenues from Social Security taxes (This would probably mean higher income taxes)
   —— C. Financing the Social Security program completely from general tax revenues (This means no Social Security tax but much higher income taxes)
9. Would favor cutting back Federal spending for domestic programs even if popular programs like Social Security, aid to education, housing, etc., might be adversely affected? YES—— NO——
10. Should we continue indefinitely the 55-mph national speed limit? YES—— NO——
11. In your opinion, should national anti-trust laws be expanded to cover labor unions? YES—— NO——
12. Do you think the revenue sharing program which returns Federal tax revenues to State and local governments for use in locally planned projects should be continued? YES—— NO——
13. As one way of meeting future energy needs, do you favor building more nuclear power plants? NEW—— NO——
14. Last year Congress cut $300-million from previously authorized aid to South Vietnam. Because of recent North Vietnamese and Viet Cong military activities, President Ford has now asked congress to provide $300-million in financial assistance and military supplies. Do you believe the aid should be given? YES—— NO——



Yes! If you want increased milk production, better herd health and reduced labor costs . . . which in turn equals greater profits.

Yes! If you want a versatile feed supplement that fits any feeding system and balances any dairy ration.

Yes! If it's Mol-Mix . . . the quality liquid feed supplement, produced by National Molasses, the liquid leader.

Convert to the Mol-Mix liquid concept and say YES! to maximum production and bigger profits!

Mol-Mix® liquid supplements

Soybean Pres. to Mexico

W. B. Tilson, President of the American Soybean Association, will head a soybean market study mission to Latin America, March 3-15. The 40-person mission will include presidents of state soybean associations, the executive committee of the A.S.A., and members of the farm press. Sponsor of the mission is Elanco Products Company, manufacturer of Treflan soybean herbicide.

In Mexico, the group will study progress of an A.S.A.-originated program to enrich the protein content of staples such as tortillas with soy flour. The group will also visit with Mexican government officials and soybean processing leaders about U.S. soybean supplies and quality.

Meetings in Colombia with government and industry officials will be aimed at increasing the use of U.S. soybeans there.

In Brazil, the 40-man mission will observe soybean production methods in both established and new soybean growing areas.

Tilson, a soybean grower from Plainview, Texas, is in his second year as head of the association representing the $10-billion U.S. soybean crop.

Atlantic Breeders Honor Dairymen

Southern Lancaster area dairymen were honored for having high producing herds this past year at the eleventh annual District 5 Meeting for Atlantic Breeders Cooperative members held February 13 at United Methodist Church, Quarryville.

Receiving Certificates of Merit for having top Dairy Herd Improvement Association averages were Ellis D. Krieder, Quarryville, Lloyd H. Ranck, Paradise R1, J. Ray Ranck, Paradise R1, Henry B. Leaman, Lancaster, Aaron E. Beiler, Paradise R1, Vernon R. Umble, Christiana, Paul V. Nissley, Holtwood, J. Mowrey Frey Jr., Lancaster. All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. The awards were presented by Willis Ritchey, Atlantic's Field Supervisor for this area.

Reports by District 5 Director James Krieder of Quarryville, Pa., and management representative David Yoder, General Mgr., informed members that Atlantic completed several significant points of development during the year. One of the Cooperative's Holstein sires named Rocket became the nation's top production bull, based on USDA-computed information.

Southern Lancaster dairymen honored recently by Atlantic Breeders Cooperative are from left: Ellis Kreider, Quarryville; Lloyd Ranck, Paradise R1; J. Ray Ranck, Paradise R1; Henry Leaman, Lancaster; Aaron E. Beiler, Paradise R1; Vernon R. Umble, Christiana; Paul Nissley, Holtwood and J. Mowrey Frey Jr., Lancaster.

Service Technicians provided 201,567 first services, and there was a 60 per cent increase in net semen sales income compared to 1973. New barns were constructed to provide isolation quarters and house up to 50 bulls, and young sires were used more extensively by dairymen.

A 25-minute movie, "Milestones to Atlantic's Future," was shown to help members see the beneficial traits being transmitted by Atlantic sires now available for their use. In travelog style, the film showed progeny and cow families of nine different sires, with accompanying descriptive narration.

Members present voted for District representatives for the coming year. Election results will be announced in the next issue of the Cooperative's monthly newsletter, since more than one meeting is held in most of Atlantic's 16 Districts.

Any interested farmer in the area is welcome. Although Dairy Partnerships will be featured, the information will be general enough to apply to any type partnership operation. Refreshments will be served.

Remove Stale Smell from Clothes

To remove the stale smell from clothes, Mrs. Ruth Ann Wilson, Extension clothing and textiles specialist at The Pennsylvania State University, says first pretreat any stains or heavily-soiled areas with a concentrated liquid detergent. Or, use a paste made of regular detergent and water. Then wash the article well, using a fabric softener.

Vegetable Outlook Summary

Fresh vegetable supplies are moderately smaller than last winter since acreage of 13 winter vegetables in 12 percent less this season. Thus far this winter, shipments of several leading vegetables - lettuce, cabbage, celery, and carrots - have been less than last year. But movement has been heavier for tomatoes and sweet corn from Florida and broccoli and cauliflower from California. Imports from Mexico through last January were light.

Imports of tomatoes, peppers, cucumbers, and eggplant through Nogales, Arizona, are increasing seasonally.

Stocks of storage onions on January 1 were 7 percent larger than a year earlier. Most of the gain was in New York and Michigan were the yellow globe variety predominates. Prices are less than a year ago for most varieties except large whites which are very scarce.

The combined pack of canned and frozen vegetables in 1974 again appeared moderately larger than the previous season. Adding packs to carryover, total supplies of processed vegetables are moderately larger for the 1974-75 marketing season, though canned corn, a major item, is in very short supply.

Much of the larger 1974 pack of canned vegetables went into concentrated tomato products - items for which complete pack and stocks data do not exist. Supplies of the other 10 important canned items counted were only slightly larger than a year ago. Beginning supplies of snapbeans, beets, sauerkraut, and tomato juice are larger, but supplies of corn, peeled tomatoes, and lima beans are smaller. Supplies of pickles, peas, and tomato puree were about the same as a year earlier. At the beginning of this marketing season, wholesalers and retailers bought actively to replenish depleted supplies, but trade movement has slackened markedly in recent weeks. Currently, many packers are offering promotional allowances, and in a few instances. list prices have been shaved slightly to stimulate movement.

Supplies of frozen vegetables on January 1 were 14 percent more than 1974. Even with ample supplies available, disappearance of the three major items - peas, corn, and snapbeans - has lagged behind a year earlier. Recent price cuts may be extended in order to move supplies which are larger than a year ago, but less burdensome than other recent years.

Despite ample supplies, wholesale and retail prices of processed vegetables rose more during 1974 than in any single year in recent history. Canners and freezers experienced costs for all major inputs - labor, evergy, containers, and raw product. Undoubtedly these higher prices have restricted consumption thus far this marketing season.

The 1974 fall potato crop was a record large 288 million cwt, 13 percent more than the small 1973 harvest and 7 percent above the previous record set in 1970.

High early season processing contract prices were reflected in the U.S. average December price of $3.45 per cwt. This compared with $3.99 in 1973 when supplies were short. Grower prices are lowest in the East and Midwest where supplies are much heavier relative to a year earlier.

A substantial cut in spring acreage is expected this season - a normal response to the record large storage stocks remaining to be sold. Grower prices may show some strength late in the storage season.

In seven major processing States, only 3 percent more tonnage was used for freezing and dehydrating as of January 1. Despite the large supply of available raw product, processors apparently weren't eager to add more to ample supplies of finished products on hand. Frozen french fry stocks on January 1 were 24 percent more than January 1, 1974. Demand for almost all important processed potato products has eased in recent weeks.

Although stocks data are not available for dehydrated potato flakes and granules, recent wholesale price declines suggest a buildup of stocks for these products as well. With ample supplies and some slackening in demand, wholesale processed potato prices may move slightly lower in the months ahead.

Record large dry bean output in 1974 means abundant supplies through August 1975, with white beans more plentiful than colored. Unless exports move up sharply, a large quantity of beans is expected to be carried into the 1975-76 marketing season. As a result, growers are expected to reduce 1975 plantings. Furthermore, in certain dry bean areas, other field crops may appear to be more favorable alternatives this year.

Export markets are likely to absorb more beans than were shipped in the previous season. However, several other nations besides the United States also have substantial export potential this year. The domestic use of dry beans does not usually change greatly from year to year, and may increase only moderately this season.

Tomato Award To Petersheim

A Lancaster County vegetable grower, who produced 194 tons of tomatoes on 5 acres, has been named a State Champion Tomato Grower for 1974 in the hand harvested class.

Elam Petersheim, Morgantown, R1, received an inscribed plaque for his high tomato production and recordkeeping practices at ceremonies during the annual Vegetable Conference February 12 at Penn State.

The State Champion Tomato Growers Club, which annually recognizes growers who produce outstanding yields for processing, is sponsored by the Penn State Cooperative Extension Service and Pennsylvania Food Processors Association.

A tomato grower for 20 years, Petersheim sold his crop to the Campbell Soup Company. He planted one variety, C-17.

Primarily a dairy farmer, the award winner grows alfalfa, corn, and tomatoes - in his crop rotation. His family and relatives pick the entire crop.

Tomatoes were planted in rows 4 feet apart. Spacing between plants in the row was 18 inches.

Fertilization practices included liquid manure and 10-10-10 plowed down. Five fungicide and one insecticide sprays were applied to the crop.

Ethrel, a chemical, was applied to induce uniformity in the ripening process.

Finest Quality Seeds (Since 1925)

Mount Joy, Pa. Ph. 653-4121

YOU REAP WHAT YOU SOW, EVEN DURING A FERTILIZER SHORTAGE.

You count on a lot of things to give you a good return. From expensive farm equipment to the right amount of sunshine. But this year more than any other, your fertilizer investment is going to make the difference.

Right now we're all struggling against the fertilizer shortage. So the quality you use becomes even more important than the quantity. And Royster is doing something to help you get the best.

There's still no way we can promise you'll get all the fertilizer you want. But this year, we're manufacturing more Bonanza Crop Specials. It's our finest fertilizer. And it's your insurance that you'll get the greatest return on every dollar invested.

Bonanza Crop Specials are supercharged with specific micronutrients. Because some crops use higher amounts of one or more micronutrients than others. And sometimes an area is deficient in certain micronutrients. That's why we make Specials for every major crop in every market we serve. And that's 13 crops in 20 states.

Our Bonanza Crop Specials are such a valuable investment we even wrote a booklet about them. To get yours, write Marketing Services, P.O. Drawer 1940, Norfolk, Virginia 23501.

Or better still, visit your friend in the fertilizer business. Your Royster dealer. He'll help you make a good fertilizer investment. Because he knows when you put good things into your land, you expect good things back.

Inter-State Local Holds Meeting

Close to 300 members and guests turned out for the annual meeting in Mount Joy on Thursday of District 7, Inter-State Milk Producers Cooperative. At the meeting, they heard from a number of speakers and elected officers for the coming year in each of the five locals within the district.

Daniel Martin, Inter-State's vice-president and a dairyman from Manheim, told the group about the work their cooperative was doing on their behalf. He enumerated the steps leading up to the decision last month by Secretary of Agriculture Earl Butz to boost milk price supports to 80-percent of parity.

Martin said that Inter-State had led the battle to get higher prices. He reminded the group that their co-op had organized the peaceful march on Washington in November. He said that while the march didn't result directly in a price boost, he was confident that it was an important factor behind the decision to finally raise the support price.

Martin also noted that Inter-State members were presently receiving cost of production adjustments over Federal Order 4 prices, and that these payments were secured from the co-op's 21 dairy customers by monthly negotiations. He said these kinds of activities needed and deserved the support of the membership.

Boyd Gartley, the co-op's director of member and public relations, also told the members about some of the things the staff has been doing to secure better milk prices for farmers.

Other speakers were Earl Stauffer, Ephrata, who gave a delegate's report on the annual Inter-State meeting in Philadelphia, and Andrew Marvin, Ephrata, the District 7 fieldman.

In his speech, Daniel Martin announced that the annual Inter-State meeting this year would be held on Nov. 25-26 at the Host Farm in Lancaster.

Honored during the meeting were Mr. and Mrs. Elvin T. Harnish, Willow Street R1, who have been members of Inter-State for a quarter of a century.

Elections for new officers and directors from the five locals were held during the meeting. The results, by local, were:

Lebanon County Local

President, John R. Moyer, Newmanstown; vice-president, Krall Hostetter, Lebanon R1; secretary-treasurer, John H. Hartman, Schaefferstown; delegate, A. Ralph McCrone, Newmanstown R1; alternate delegate, Arthur E. Brandt, Hershey R1; hauling committee, J. Melvin Brandt, Hershey R1.

Millersville Local

President, Nelson R. Habecker, Lancaster R1; vice-president, Melvin M. Groff, Lancaster R6; secretary-treasurer, Kenneth L. Shertzer, Conestoga R1; delegates, David E. Hess and J. KEY TO PROFIT
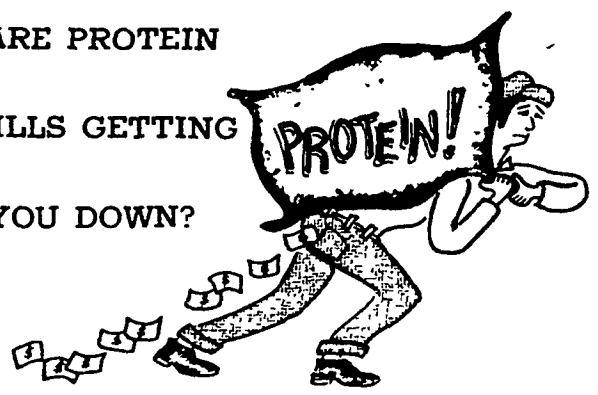
AGRI KING, inc.
PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.

ARE PROTEIN BILLS GETTING YOU DOWN?



Many AGRI-KING customers have *eliminated protein bills completely*, others have reduced them to a minimum !

"HOW ?"

By using our *free customer computer service* to balance their rations according to their own personal needs. Many dairy and beef rations *do not need extra purchased protein ! ! !*

By testing their feed to make maximum use of protein, vitamin and mineral content.

By growing their own protein, and saving the protein they grow ! ! !

AGRI-KING, INC. IS YEARS AHEAD . . . . . .
AND YOU CAN BE TOO ! ! ! !

DE LAVAL
The DeLaval Compact Combine can keep you in dairying.
The DeLaval Compact Combine gives you all the labor-saving, time-saving, better-milking of a full pipeline at half the cost. Or about the same cost as a bucket and transfer system. With a Compact Combine, there are no more buckets to lug and no more buckets to scrub.

The DeLaval Compact Combine was designed and built by DeLaval to meet the needs and the pocketbooks of dairymen milking up to 50 cows. See your DeLaval Dealer about our "Compact" today. It costs about half what you'd expect to pay for a pipeline.

Livestock Day Planned

The latest developments in meat animal research, nutrition, and management will be featured at the 1975 Livestock Day scheduled for March 4 at The Pennsylvania State University.

"The program, of special interest to beef, sheep, and swine producers, will be held in the University's J. O. Keller Building starting at 10 a.m.," said Professor Dwight E. Younkin, Penn State Extension animal scientist and program chairman.

Keynote speaker at the Livestock Day will be Dr. E. Paul Taiganides, of Ohio State University, internationally - known specialist in pollution control and solid waste management. He will present the topic "Everything You Always Wanted to Know About Pollution But Were Afriad to Ask."

Dr. Taiganides has lectured in most of the United States and Canadian Provinces, in all but three countries in Western Europe, and in Poland, Czechoslovakia, Russia, India, and Japan.

For persons interested in beef cattle production, Penn State specialists will discuss such topics as breeds and crossing systems, relation to marbling and eating quality, alternate protein sources, methods of pasture renovation, and silage-grain ratios for finishing cattle.

The swine program will feature Dr. Taiganides discussing aspects of water resources. The session also will focus on chemical and mechanical controls of liquid manure odors, ventilation to control odors in a closed building, waste disposal units, swine behavior research, and a Meat Animal Evaluation Center summary.

Sheep producers will hear reports on new developments in forage harvesting and feeding, ensiled animal wastes, lamb behavior, growth studies with Ralgro, and a look at Extension and Resident Education programs at Penn State.

Professor Younkin notes that those interested in attending the 1975 Livestock Day should register in the lobby of the J. O. Keller Building between 9:30 and 10 a.m. on March 4. The program will conclude at 3:30 p.m.

SNACK TIME

Two slices of fresh apple put together with a layer of cream cheese or slices of Cheddar cheese makes a hearty and substantial snack

Discussing plans for the 1975 Livestock Day scheduled for March 4 at The Pennsylvania State University are Dwight E. Younkin, (left), Penn State Extension animal scientist and general program chairman; and Dr. Lowell L. Wilson, professor of animal science, beef cattle committee chairman. The program is designed to be of interest to all livestock producers.

PennAg Annual Convention Set

Phillip M. Spalding, York Flour Mills, York, President of PennAg Industries Association, announced recently the appointment of the Association's 97th Annual Convention Committee. The Convention will be held September 17-19, 1975, at the Gettysburg - Sheraton, Gettysburg, Pennsylvania. Three hundred of the statewide agribusiness association's members are expected to attend.

The Convention Committee Chairman is Robert Weindel, Agway, Inc., Harrisburg. Other Committee members are William Durboraw, Thomasville Stone and Lime Co., Thomasville; Paul J. Green, Farmer's Supply Co., Walkersville, Md.; James A. Price, Beacon Milling Co., Inc., York; and Thomas R. Zeigler, Zeigler Brothers, Gardners, Pa.

According to Weindel, the convention will include speakers and meetings on transportation, impact of world markets on Pennsylvania agriculture, a panel discussion on agribusiness problems, etc. Other Convention features include a complete ladies program, exhibits, golf tournament and entertainment.

"'Dedication to Victory' is the theme for our convention," Weindel stated. "With so much pessimism rampant in our society today, our committee decided instead to plan a program which will be positive and affirmative. It is appropriate that Gettysburg should be the site for this convention - the place where one of the greatest affirmations of our time took place."

Children Need Encouragement

As a parent, try to objectively appraise your child's ability, suggests James Van Horn, Extension family life specialist at The Pennsylvania State University. Then encourage and even insist he work up to that capacity. Help your child dream enough to realize what he can or can't do. Then provide encouragement, rather than pressure to help him seek his goals.

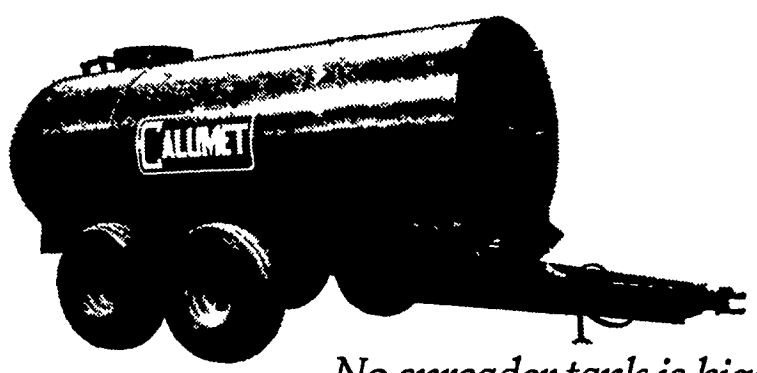
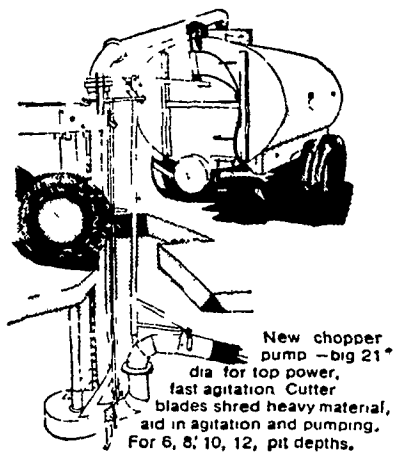
3250 gallon spreader tank





New chopper pump —big 21" dia for top power, fast agitation Cutter blades shred heavy material, aid in agitation and pumping. For 6, 8, 10, 12, pit depths.

No spreader tank is bigger Or tougher

We built this whopper to cover more acreage per trip . and take abuse year in and year out Its powerful slinger spreads a 40' path, keeps liquid close to ground. Discharge valve won't clog or freeze. Walking beam wheels mean easy pulling. Surge brake provides extra safety Rugged tank has internal baffles, frame is super strong for long life Take a look It's your best spreader tank value If you need a smaller one, we manufacture those, too.

"Who's going to listen to me? I'm just one voice."

Do you really think God is going to let you get away with that?

Of course, you'd like to help make the world a better place. Maybe you can't do it alone. But there's plenty you can do with others at your local church or synagogue. Example: one religious group helped the Navajos set up a cooperative trading post on their reservation. Now the Indians can purchase goods at a lower price. Even more important, they've learned that other people care about them. The God we worship expects all of us to help our brothers and sisters.

Start treating your brothers and sisters like brothers and sisters.

Versatility... also beauty... now with faster, stronger and more economical construction for all types of farm and commercial buildings...

A Year Around Controlled "Ideal" Environment

Your barn will always be a healthier place for your animals with Rigidply rafter construction. For Free Stall Housing continuous ventilation is assured by a ventilator roof and air flow always available through the heel. This flexibility allows proper ventilation for all seasons with a minimum amount of condensation. The flexibility of the arch extends also to construction; often the arch and wood decking system will permit construction to continue into peak winter months.

Build your next building using dependable wood LAMINATED RAFTERS AND ROOF TRUSSES—and save time on your job by fast and easy erection.

TOP DHIA HERDS IN BERKS, CHESTER AND LANCASTER ARE FED BROWN'S

CONGRATULATIONS...

BERKS

Mr. Norman Z. Nolt, Myerstown RD1, upon winning the 1974 BERKS County DHIA High Herd Butterfat Award with an average of 675 lbs. per cow. Mr. Nolt's Herd averaged 16,628 lbs. of milk per cow with 37 cows on test.

CHESTER

Mr. Jefferson D. Yoder, Elverson RD3, upon winning the 1974 CHESTER County DHIA High Herd Butterfat Award with an average of 688 lbs. per cow. Mr. Yoder's Herd averaged 17,386 lbs. of milk per cow with 53 cows on test.

LANCASTER

Mr. Rufus G. Martin, Ephrata RD3, for winning the 1974 LANCASTER County DHIA High Herd Butterfat Award with an average of 674 lbs. per cow. Mr. Martin's Herd averaged 17,021 lbs. of milk per cow with 25 cows on test.

Yes, We Are Proud...

We are proud that this is the second straight year these three dairymen have won their individual county DHIA High Butterfat Production Awards. We are proud of our customers fine cows, skilled management and achievements. Records such as these are a source of pride to us. We are pleased with the part that BROWN"S FEEDS and SERVICES had in helping to attain these records. We shall continue to strive in 1975 to give farmers the best quality feed and nutritional service possible.

Food - What's Behind The Label

by: Melissa Piper
Associate Editor

Years ago when many families, baked their own bread, churned their own butter and butchered their own animals for meat, there was little need for outside inspection and grading of the food, for each family was responsible for the purity and grade. If problems occurred, it was also the family's responsibility to find out just what might have happened.

However, as industry swept the country, more people depended on others not only to raise food for their consumption but also to process it into edible forms. As processed food became more and more required and available, the need for assurance of quality and purity seemed evident. Not until the early 20th century however and the investigative reports of the muckracking novelists such as Upton Sinclair did the government begin to intervene in the food processing industry.

Since that time, many laws have been passed both on the national and state level to control and inspect the quality of processed foods and meats insuring the best quality for the American consumer.

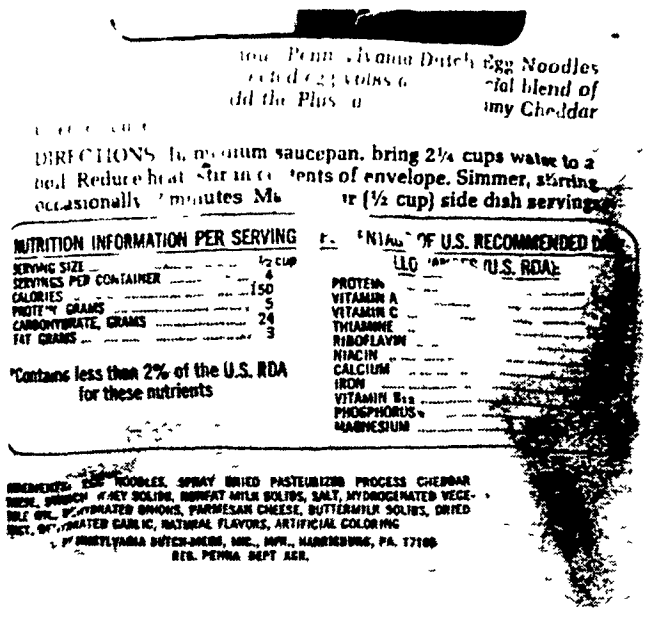
In the past decade consumers have voiced many complaints concerning the American food industry and have encouraged even more detailed anaylsis of just products are being used in processed foods and the nutritional value of such.

Thus, not only have the supermarkets changed in appearance today but also the containers, bottles and packages that our food comes in. On many labels are now found the list of ingredients, inspection or grade notifications, nutritional values of the ingredients and even some forms of unit pricing.

For the average shopper, many of these markings are somewhat confusing and often ignored since they seem irrevelant to the food itself; however, much of the information on the label does serve a useful purpose and once understood can aid the consumer in insuring they have purchased a fresh and quality tasted product or food.

One of the most common and frequently noticed of all information on foods is the United States Department of Agriculture (USDA) grade shields. The shields are mostly found on meat such as lamb, turkey, beef, poultry and also on butter and eggs. It appears only on those foods that are officially graded according to the Federal grades of quality.

Buying food might seem like a difficult task now, but consumers should use all available methods including the information provided on labels to purchase exactly what they want.



Nutritional labeling on food packages can aid the consumer by explaining in what amounts protein and nutrients are contained in the food product.

To insure quality they often employ individuals to participate in test panels before actual production of an item begins and while it is being produced many companies have their own quality control personnel on hand to monitor the processing.

The Food and Drug Administration has set up standards to insure that processed foods clearly indicate what the food product is while state administrations often inspect the products for wholesomeness.

Labels must show the ingredients of the package beginning with the item weighing the most, the net weight of the product, the packers and distributor's name along with any inspection notices.

If a picture is used on the label, it must conform to the product within the container. For example if a meat product shows a certain number of slices or portion on the label, the same amount must be contained within the package. If any garnishes are used that are not in the product itself, an explanation such as "serving suggestion" must be indicated.

Often identifying codes that relate to the time and type of production are also printed on the label or elsewhere on the package.

It is a good idea to read the label carefully to make sure you are purchasing just what you what. A little extra time is involved yet it may be very well worth your while to do so.

Nutritional Labeling

Much of the food placed on grocery shelves today, bear a chart outlining the nutrients and their values found in the food itself. This trend came about only a few years ago when consumers felt they should know just what nutritional qualities were contained in the food they were purchasing.

Not only does nutritional labeling alow consumers to know what amount of protein, carbohydrates and vitamins are contained in the food but also gives information on the calories contained in a serving.

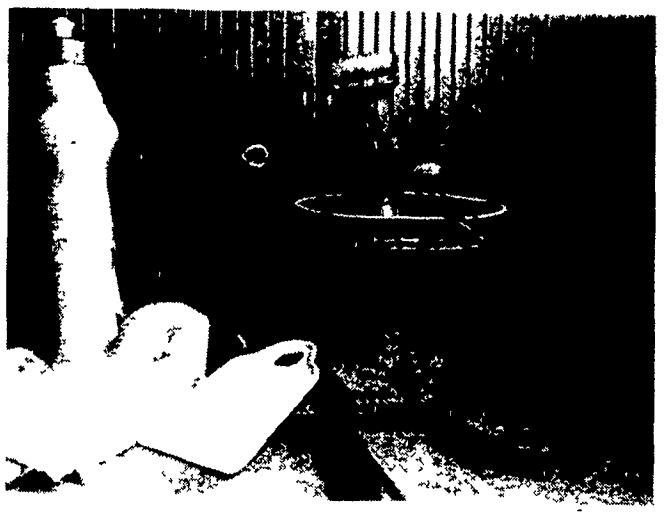
Nutritional labeling is voluntary although any food product which boasts extra nutritional values must label their ingredients.

If nutritional labeling is used, the servings per unit and the size of the individual serving is usually shown. The United States Recommended Daily Allowance values are also usually listed for clarity. Those nutritients listed include protein, carbohydrates, fat (to the nearest gram) along with vitamins A, C, thiamine, riboflavin, niacin, calcium and iron. These nutrients are shown as a percentage of the United States Recommended Daily Allowance.

Unit Pricing

Other standards or markings which may appear on food often include unit pricing and open dating.

(Continued on Page 39)



To insure health in the family, wash all utensils and cutting boards thoroughly with a hot sudsy water solution especially after contact with raw meat and poultry.

Grading is not mandatory and is not required by federal law however to be granted grading services, packers and producers must meet strict requirements for sanitation and cleanliness.

Federal grading began over 50 years ago and has become quite widespread over the subsequent years with many food processers using the services.

Under the USDA grading system, meat is classified according to quality. The most familiar to most consumers is probably the grades of beef of which there are 8 ranging from prime to canner.

Poultry although graded is usually not sold as fresh meat with a grade less than A. Grade A usually represents a bird that is meaty and better than average in appearance.

Another USDA grade familiar to most consumers is the grade which appears on eggs. Eggs usually are graded with the letters AA, A, and B which represents the quality of the food.

Eggs graded AA usually have high rounded yolks with upstanding whites that do not spread out. These eggs should be used when appearance is important such as fried eggs and breakfast foods.

A-eggs are similar to AA quality although they might have slightly less rounded yolks and whites that spread out further.

Lower grades of eggs such as B classified eggs most frequently have thinner whites and flattened yolks. These eggs are better used in baked goods where the appearance is not as important.

Many dairy products often carry USDA grades with the most frequent being butter. Butter graded AA is usually the best quality with a sweet flavor and aroma and a smooth texture. The A grade is similar to AA but may have a slightly less sweet aroma. Grade B butter often exhibits a slightly acid flavor and is not readily used for spreading butter.

Since many fruits and vegetables are sold wholesale or as fresh items they often do not obtain USDA grades. If requested, the processors may have the produce federally graded according to color, size, shape and maturity. The grade usually affixed is either Fancy 1 or Fancy 2 according to the quality.

Food Labeling

Labeling foods has a three fold protection for the consumer. It helps to clarify the standards of identity set by the Food and Drug Administration (FDA); defines what certain foods really are and what they contain and also allows the USDA to define levels of quality.

Most food processors are interested in producing only the best quality of food for consumers.

Stuck in the same old rut of everyday living? Why not try something a little different for a change. The Pennsylvania State University offers a host of correspondence courses in agriculture, family living and community development Whether you'd like to study sheep management, flower arranging or personal grooming - the College of Agriculture offers a host of courses suited to a variety of needs

For more information on the courses offered write to Correspondence Courses, 307 Agricultural Administration Building, Pennsylvania State University, University Park, Pa 16802.

Pet Care

Today more than ever before there are more and more pets, which means that your local veterinarian may not have as much time to spend with your individual pet as he once did.

As a pet owner you should be willing to take on some of the responsibility of pet care once delegated only to the veterinarian.

For example if you own a dog why not try learning some simple techniques to care for the animals. Have your veterinarian or a qualified person teach you how to trim your dog's nails, and bath and clip the animal.

These procedures will give your veterinarian and his assistants more time to care for sick and injured animals. The time you spend with your animals will also help them feel confident and relaxed.

What's Behind

(Continued from Page 38)

Unit pricing as the term indicates is the price per unit either per pound or ounce. While the total price tells the consumer just what he is paying for the lump sum, the unit price allows the consumer the opportunity to know just how much the item is costing per pound or ounce.

Unit pricing is often found on meat where both prices are indicated for clarity.

Until recently, open dating or the shelf life estimation was used only by the store clerks and the processing firm to insure freshness of the product. Most consumers saw a code of numbers but often did not realize the importance.

Following much consumer inquiries, the processing firms have now explained their open dating codes to the public. There are four main types of open dating with the most common being the "pull date". The date indicates the last day of retail sale of fresh food. The code is usually preceded by the words "sell by . . . .".

Still another open dating method is to print the expiration date which is usually clarified by the words "do not use after . . .".

The packing date may or may not be used as a form of open dating on the product.

Food Safety

While food processors are under regulation to insure that consumers have the opportunity to purchase only good quality food, the consumer must also be warry of his own judgments.

Although damaged cans may be selling cheap in the store, a consumer should check carefully before purchasing damaged items. Under no circumstances should a shopper buy cans that are swollen or leaking as bacteria may very possibly have entered, contaminating the product.

Care should also be taken in preparing food, especially meats. Always wash your hands before handling meat and cook completely according to directions. Always thoroughly wash untensils and cutting boards that have been in contact with raw meat using a hot soapy solution.

If there is any reason to suspect that a food product is not fresh or is spoiled take special precautions. Do not taste the food but keep it, if possible, along with the container it was purchased in. Take it to the store manager or alert a local or state regularatory office.

Buying food may seem quite complicated today, but the better informed a consumer is the better his chance of purchasing the food that he really wants and needs. The next time you visit the grocery store, take a few minutes longer to check the labels for information making sure what you purchase is really what you want.

The information on the label has been placed here for our convenience, how you decide to use it is your consumer right.

(The information used in writing this acricle was obtained from the 1974 USDA Yearbook of Agriculture and several USDA pamphlets.)

British Heart Disease Report

How to prevent heart disease? The search goes on. And medical committees regularly meet to evaluate research evidence.

Because diet, smoking, and high blood pressure are things that we can manipulate, these factors receive a great deal of attention. Experiments concerning their possible relationship to heart disease can be conducted and reported. And statistical evidence, though often questionable as to its reliability, can be gathered from various countries.

One of the most recent reports on diet and heart disease was published earlier this year by Great Britain's Department of Health and Social Security, the British equivalent, roughly, of the U.S. Department of Health, Education and Welfare. Here are highlights:

Panel Statement

An official British advisory panel unanimously agreed "that they cannot recommend an increase in the intake of polyunsaturated fatty acids in the diet as a measure intended to reduce the risk of the development of heart disease. In their opinion the available evidence that such a dietary alteration would reduce the risk in the United Kingdom at the present time is not convincing."

A majority of the panel did recommend that the amount of fat in the United Kingdom diet should be reduced. But a minority of the panel could not agree to limiting "the consumption of fat by the population as a whole." This is in spite of the fact stated in the report that "the percentage of food energy derived from fat in the United Kingdom has risen and continues to rise, and about one half of the energy derived from fat is provided by saturated fatty acids."

Said the panel: The idea that a diet rich in fat makes heart disease more likely "is complicated by the fact that people who consume a high fat diet are often heavy cigarette smokers and tend to have a high sucrose (sugar) intake."

Speaking of the research in which polyunsaturated fats have been substituted for some saturated fats, and the results interpreted as evidence that such dietary adjustment may prevent heart disease, the panel said "in none of the trials was the evidence clear cut," and in one trial a rise in the incidence of gallstones was detected.

What It Means

This all squares with my personal convictions about diet and heart disease, at this point. A physician may wish to make dietary recommendations for specific patients he feels are at risk. But to recommend dietary changes for the general population, as the American Heart Association seems insistent upon doing, or implying, is just too much and very poor science. The United States' National Heart & Lung Institute apparently agrees. That's why the Institute is spending millions on a six-year trial to determine whether dietary changes can really help anybody. If they knew the answers, they wouldn't be spending our tax dollars to try and find out.

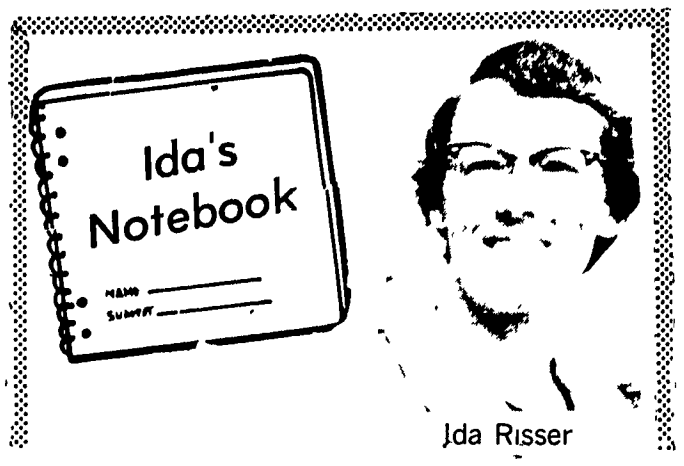
Canned pear syrup, molasses and aromatic spices flavor a sweet and pungent sauce for a hearty entree of meatballs and canned Bartlett pears The meatballs, a savory mixture of seasoned beef and pork, simmer briefly in the spicy sauce. The canned pear halves are added to gently heat through, and the entree is ready to serve over steaming hot rice

Pacific Coast canned Bartlett pears are always an appealing addition to a meat platter, and are especially ideal for dressing up less-expensive cuts Delicate and pleasing in flavor, they adapt easily to a wide range of exciting menu ideas.

Spiced Meatballs And Pears

1 (29 oz.) can Bartlett pear halves	½ cup chopped Sweet Spanish onion
¼ cup molasses	½ cup dry bread crumbs
¼ cup vinegar	½ cup milk
1 teaspoon whole cloves	1 egg
1 stick cinnamon	1½ teaspoons salt
¼ teaspoon salt	¼ teaspoon pepper
1 pound ground beef	⅛ teaspoon nutmeg
½ pound ground pork	1 tablespoon cornstarch

Drain pears, reserving syrup. Simmer pear syrup, molasses, vinegar, cloves, cinnamon and ¼ teaspoon salt for 10 minutes. Combine remaining ingredients except cornstarch Shape into balls and fry in hot oil until browned on all sides and cooked through Pour pear syrup mixture over meatballs and cook over low heat 5 minutes. Thicken liquid with cornstarch dissolved in 1 tablespoon cold water. Add canned pear halves and heat through. Serve over hot steamed rice. Makes 6 servings.



As far as I'm concerned, you'll be reading this article on Washington's Birthday or Feb. 22. Now I know, the banks were closed Feb. 17, to celebrate his special day so that many people could have a three day weekend.

Sometimes I ponder how the three day weekends are used — to make household repairs, to travel and visit or just eat, sleep and watch television. It is surprising that Valentine's Day wasn't moved to a Monday also.

Long ago I became the first full time female employee for a farm cooperative. Even after working there for eight years, there were only six girls among the 75 employees. Now those were ideal working conditions and we enjoyed all the attention we got; long before women's "lib."

Cooperatives have played an important part in the lives of several of my children too. My daughter was given a trip to Michigan when she was fifteen and won in a milk co-op competition. Both of my sons have taken tests which enabled them to participate in state and national co-op meetings.

Cooperation is important in completing a family project or building a barn. Just after a co-op meeting recently, we had a chance to practice what we preach as a farmer was unable to start his car. Before he had a chance to worry about getting home another car drove up and with jumper cables, he was soon on his way.

Last month I had an opportunity to practice cooperation also, as I took bologna to a butcher to be sliced and overwhelmed him with almost 400 lbs. Since he was alone in his shop, I put on a butcher apron and helped "skin them" or rather cut and pull the muslin bags off the 18 lb. bolognas. In a short time I was headed home with the wonderful task ahead of wrapping the meat for the freezer.

IMPORTED FOODS

Identification of imported foods is usually made for most products - Danish hams Taiwan pineapple and the like But if the product is further processed or packed in this country, you may not see an identification of the origin of the food

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Easy Care Fashions In Sewing Accessories

Fabrics for Spring are soft, supple, feminine - you'll hear all these words and more. But will you hear "easy care?" Probably not, though we all know that it is an ever-present consideration in most fabric purchases. It has become a requirement in the fabric business - it is not fad, or even fashion - it is fast becoming a classic. It is significant that only four of the nine care labelling standards do not begin with "machine wash . . ." - it is even more significant that an even smaller proportion of fabrics sold in fabric departments are sold under those standards.

Let's look at just a few of the sewing accessories which guarantee an easy-care garment. Thread was probably the first - all thread manufacturers now offer polyester or polyester blend thread. One manufacturer is now offering polyester buttonhold twist. (How many people realize that silk twist is NOT washable - that it was designed for those beautiful, but dry clean only, woolens, silks and linens?)

Zippers quickly followed suit. Both conventional and invisible zippers are available with polyester on polyester blend tapes and the metal zipper is practically a thing of the past in most parts of the country, with the advent of synthetic coils. In the last year, we have seen the appearance of knitted zipper tapes - knit associated in the mind of the consumer with the ultimate in easy-care.

And buttons. Buttons? Certainly not polyester buttons? No, but not all buttons are washable, either. Most metals and woods, and in fact some fancies, are not washable - and most button manufacturers will even recommend removing them during any kind of cleaning. One manufacturer admits that it is not fashions in Paris or New York which has caused sales in metals and woods to fall behind washable buttons in recent years, but the "fashion" in easy care. Remember, if it doesn't say "washable," it isn't!

Finally, tapes - trims - braids - ribbons. All are available in polyester or polyester blends. Functional tapes - polyester blend bias tape, seam binding, even 100 percent polyester twill tape for easy-care tailoring. And decorative trims - polyester lace, braids, even rick-rack. Nothing discourages a new sewer faster than a shrunken seam tape or a puckered trim.

Plan For Retirement

If you plan to retire in the next few years, it's not too early to start planning for it. Some points to consider when planning your retirement are as follows.

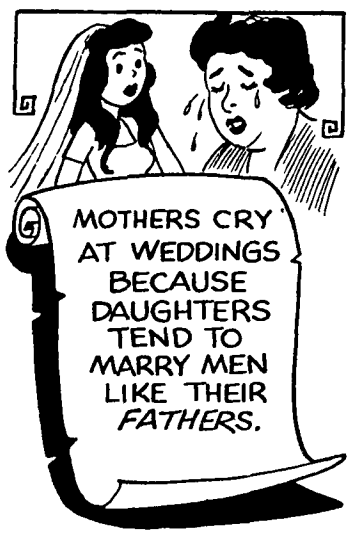
Where you live - in your present community or a new one? And will it change your type of housing - perhaps go from a house to an apartment, or to a smaller house?

What does retirement mean to you? An opportunity to stop work, cut down on activities, smash the alarm clock and rest? Or does it mean time to travel, develop a hobby, start a second career?

You may have a job where you can make the transition from the workday world to retirement in easy stages. As you taper off on the number of hours you spend in the office or shop, increase the time you spend on other activities.

Experiment with things you are interested in and find out what hobbies and activities you would enjoy in retirement. Maybe you don't want to retire. Then how about starting a second career? You may have a talent you have always wanted to use or you've had a secret yen to try a new field of work. Now is your chance.

PUNCH LINE OF THE WEEK



Working Homemaker Series Scheduled

The Lancaster County Extension Service announces a series of three meeting scheduled for the working homemaker.

Monday, February 24th, 7:30 - 9:00 P.M., Farm and Home Center: "Financial Management". Mr. Thomas C. Mayer, Farmers First National Bank, Lititz: Topics: How to stretch your dollars, budgeting for the family, financial goals of the family.

Monday, March 3rd, 7:30 - 9:00 P.M., Farm and Home Center, "Planning for Effective Communication". Dr. Gary Gruber, Marriage and Family Counselor. Topics: Husband-wife-parent-child dyads; balancing the needs of a family with demands of a job; looking at a model for an interdependent family.

Monday, March 10th, 7:30 - 9:00 P.M., UGI Corporation Building, Lancaster: "Quick and Easy Money-Saving Foods for the Family", Bonnie Miller, Home Economist, UGI Corporation, Lancaster. Topics: Economical Main dishes for the family; make ahead entries, foods that are quick to fix and nutritionally adequate for the family.

The Penn State Cooperative Extension Service offers education programs to any interested people regardless of race, color or national origin. If you are interested in attending any or all of the evening series for working homemakers, pre registration is requested but not required. Contact the Lancaster County Extension Service, Farm and Home Center 394-6851.

Vegetable Growers Prize To Stoltzfus

A Chester County vegetable grower, who produced 480 tons of usable tomatoes on 16 acres, has been named a State Champion Tomato Grower for 1974 in the hand harvested class.

Amos K. Stoltzfus, of Honey Brook, received an inscribed plaque for his high tomato production and recordkeeping practices at ceremonies during the annual Vegetable Conference February 12 at Penn State.

The State Champion Tomato Growers Club, which annually recognizes growers who produce outstanding yields for processing, is sponsored by the Penn State Cooperative Extension Service and Pennsylvania Food Processors Association.

A tomato grower for 30 years, Stoltzfus produced an average of 30 tons of usable tomatoes per acre. The product was sold to the Campbell Soup Company.

Two varieties were used, 17 and 28. A former State Champion Tomato Grower, he planted the crop in rows 3-½ feet wide and 22 inches between plants in the row.

His fertilization practices included a plant starter solution, an 0-20-20 formula, cow manure, and 5-20-20.

Seven persons picked the tomatoes and were paid by the basket. Five fungicide sprays and one herbicide application controlled weeds and diseases.

Stoltzfus farms 205 acres. His primary income comes from beef and dairy production.

Junior Cooking Edition

Home on the Range

We are featuring a variety of recipes sent to us by our Junior Cooks. There seems to be no "sugar cost" problems in their eyes as many of their recipes seem to be for tasty desserts.

Facts About Onions

To keep eyes from watering while cutting onions, slice or cut onions under cold, running water. Slice onion from top rather than root end.

xxx

Here's surprising news — or did you know that your windshield won't frost in winter if you rub the cut side of a raw onion over it?

xxx

You can add excitement to a roast or meat stew by sticking three whole cloves into an onion and cooking with it. Delicious!

xxx

When selecting onions, look for large, round onions with burnished, delicate, golden-bronze, paper-like skins that crackle at the touch. Necks should be dry and show no sign of sprouting.

xxx

Brown Sugar Drops

1 cup soft shortening
2 eggs
2 cups brown sugar
½ cup soured milk or buttermilk
3½ cups flour
1 teaspoon salt
1 teaspoon soda

Mix shortening, brown sugar and eggs thoroughly. Stir in milk. Measure flour by sifting. Blend flour, soda and salt. Chill at least 1 hour. Heat oven to 400 degrees. Drop rounded teaspoonsful 2 inches apart on a greased baking sheet. Bake 8 to 10 minutes or until almost no imprint remains. Makes about 6 dozen cookies.

Elaine Zimmerman
Age 8
Arbela, Mo.

xxx

Rice Cakes

1 cup cooked rice
3 eggs separated
1 cup milk
1 tablespoon sugar
1 teaspoon baking powder
1 cup flour
½ teaspoon salt
1 tablespoon melted butter

Add beaten egg yolks to warm cooked rice and beat. Add all the other ingredients and mix together. Fold in stiffly beaten egg whites. Drop by spoonful onto hot griddle and brown on both sides. Serve with syrup.

Janet Horst
Age 14
Ephrata

xxx

Date Cake

2 eggs
2 cups granulated sugar
2 tablespoons butter
3 cups flour
2 cups dates
2 cups boiling water
2 teaspoons baking soda
2 teaspoons vanilla

Bake at 35-40 minutes at 350 degrees.

Sylvia King
Christiana

xxx

Norwegian Pie

2 cups cooking apples, sliced or diced
1 cup nuts, pecans or walnuts
1 cup flour
1½ cups granulated sugar
2 teaspoons baking powder
½ teaspoon salt
2 eggs
½ teaspoon vanilla

Mix dry ingredients together adding eggs, apples, nuts and vanilla. Mix thoroughly. Butter sides and bottom of two 9 inch pie plates and fill ½ full. Bake at 350 degrees for 30 minutes. Serve with whipped cream.

Donna Eberly
Age 13
East Earl

xxx

Cherry Coke Salad

1 pound can bing cherries
1 pound can crushed pineapple
1 - 6 ounce package cherry flavor gelatin
2 (6½ ounce) bottles of cola soda

Drain juice from fruit; add water if necessary to make 2 cups. Heat juice to boiling and add gelatin stirring until dissolved. Cool and add cola and fruit. Pour into 1½ quart mold. Chill until set. Serve with salad dressing, cream cheese dressing or whipped cream. Makes 8 servings.

LeAnn Kurtz
Age 9
Ephrata

xxx

Blackberry Cobbler

3 tablespoons butter
1 cup sugar
1 egg
½ cups flour
½ teaspoon salt
1 teaspoon soda
2 teaspoons vinegar
½ teaspoon each of cinnamon and cloves
¼ cup blackberry juice
Two-thirds cups blackberries

Cream butter and sugar together. Add egg and beat until fluffy. Sift flour and measure. Sift dry ingredients together and add alternately with juice and vinegar. Beat thoroughly after each addition. Add berries and stir just enough to blend into dough. Pour into a greased baking pan 8 inches square. Bake at 350 degrees for 40 minutes. Makes 6 servings.

Margaret Horst
Age 9
Mt. Pleasant Mills

xxx

Cherry Pudding

Combine:
2 cups cherries
1 tablespoon flour
1 tablespoon butter

Bring to a boil:
1 tablespoon butter
1 cup sugar
½ cup milk
2 eggs
¼ teaspoon salt
1 teaspoon baking powder
1½ cups flour

For fresh cherries, add ½ cup sugar and 1 cup water. Cream the butter and sugar. Add other ingredients and beat well. Put cherry mixture in greased pan and pour batter over them. Bake 30 minutes. Serve with sweet milk.

xxx

Butterscotch Chiffon Pie

1 envelope unflavored gelatine
¼ cup cold water
3 eggs
1 cup milk
2 tablespoons butter
1 cup brown sugar
½ teaspoon salt
½ teaspoon vanilla
¼ cup granulated sugar

Soften gelatine in ¼ cup cold water. Scald milk in double boiler. Mix egg yolks and brown sugar. Add hot milk gradually then butter and salt. Return mixture to double boiler and cook until custard consistency. Add gelatine to hot custard. Stir until gelatine is thoroughly dissolved. Cool until consistency of unbeaten egg whites. Add vanilla and stiffly beaten egg whites to which ¼ cup sugar has been added. Pour into baked pie shell and chill. Serve with whipped cream. Makes one pie.

xxx

Bread Pudding

2 cups milk
1½ cups dry bread cubes
¼ cup sugar
¼ teaspoon salt
1 or 2 eggs slightly beaten
½ teaspoons vanilla
2 tablespoons margarine
½ cup raisins if desired

Scald the milk, pour over the bread cubes and cool slightly. Combine the sugar, salt and beaten eggs. Add to the milk and bread, then add vanilla, butter and raisins. Pour into a lightly greased pudding dish. Set the dish in a shallow pan of hot water and bake at 325 degrees for about 45 minutes.

Elizabeth Herschberger
Kirkwood, Pa.

xxx

Walnut Cookies

5 egg whites
2 cups sugar
½ cup butter
½ cup shortening
6 cups flour
walnuts

Beat egg whites first then add sugar. Add butter and shortening (melted). Add flour and stir. Drop by spoon on cookie sheet. Bake at 325 degrees until lightly brown. Makes about 10 dozen cookies.

Lois Witman
Manheim, Pa.

xxx

Zucchini Bread

3 eggs well beaten
1 cup salad oil
2 cups sugar
2 cups peeled, grated zucchini
3 teaspoons vanilla
3 cups flour
1 teaspoon salt
¼ teaspoon baking powder
1 teaspoon soda
¾ teaspoon nutmeg
3 teaspoons cinnamon
1 cup nuts

Beat eggs in bowl, add oil, sugar, zucchini and vanilla. Sift dry ingredients together and add to first mixture. Fold in nuts. Pour into 2 large oiled and floured pans. Bake at 325 degrees for 1 hour or until done.

Farm Women Societies

Berks Co. Society 8

Jeanne L. Johnson, Administrative Clerk at Metropolitan Edison Company, will speak to the Berks Society of Farm Women 8 on Tuesday, Feb. 25 at 8 p.m. at the home of Mrs. Donna Hix, R1, Bernville, PA.

Her topic is "Life As A Minority." She will share some of the innermost struggles of a minority in a question and answer format.

Mrs. Johnson is a native of York, PA. She was graduated from William Penn Senior High School and took several courses at Reading High Evening School. She worked in New York City prior to joining Met-Ed in 1972.

Berks Co. Society 5

Berks County Farm Women Society 5 will meet on Monday, Feb. 24, at 7:30 p.m. in the home of Mrs. James Batz. The program will be a talk on fire hazards by Edmund W. Keiper, supervisor - residential services for the Met-Ed company.

The group reported that the Hoe-Down held recently at the Stouchsburg Fire Hall was a success.

...and we're slashing our loan rates, too.

Buy a new car in February and make it easier on every month's budget.

Making payments on a new car can take quite a bite out of your monthly budget. We know that. So we've introduced a special program to make car-buying easier on your pocketbook.

Purchase a new car between February 1 and February 28, 1975, and get specially reduced interest rates on an automobile loan. Only from Farmers First. Add this savings to the rebates now offered by many new car manufacturers, and we think you'll agree . . . there couldn't be a better time to buy a new car.

Just ask about special reduction on interest rates at any Farmers First office or any of these participating new car dealers.

Farm Women Societies

Society 3

Society of Farm Women 3 met Sat. Feb. 15, at the home of Mrs. Robert Hollinger, Elm.

A scholarship of $300 will be awarded to a senior of either Cocalico, Ephrata or Warwick who plans to major in either Home Economics or agriculture.

A contribution of $50 was given to the American Heart Association and one of $35 to the Lancaster Lung Association.

Mrs. Jesse Balmer reported on the recent Executive Board meeting of the Lancaster Society of Farm Women. The spring rally will be held April 30 at Hershey.

Suggestions for the Lancaster County Project are: buying a piano for the Farm and Home Center, Goodwill Industries and LARC.

The program for the evening was a film and discussion "Fact or Fiction" presented by Carolyn Peters, a representative of the American Heart Association.

The next meeting will be Saturday, March 15 at Salem Lutheran Church, West Main Street in Ephrata. Members of Society 20 will be guests at a luncheon at 1:00 p.m.

Society 8

Farm Women Society 8 met at the home of former president, Anna Mae Eby and her sister, Ruth Eby, on Saturday, February 15, at 2:00 p.m. Mrs. Lewis Bixler, the new president, presided.

Twenty-four members were present, and a lively experience meeting developed as members responded to roll-call by telling of the worst snowstorms remembered. Not only were huge drifts reported, but at one home a stranded doctor had to set two broken arms of other injured persons before the group could leave a house. Another member, a former teacher, recalled how her old horse dropped dead from over-exertion before she reached her home in the sleigh in a mounting storm.

Mrs. Harold Nye led in devotions after a brief period of singing accompanied by Mrs. Charles Shank. Minutes of the December meeting were read by the secretary.

The Sunshine Committee has been especially active recently and communications of gratitude for remembrances received were expressed by six members who had experienced bereavements or hospital visits.

After the business meeting, Miss Isabelle Endslow brought a review of a book, "Lighthouse," by Eugenia Price. This is one of a series of three books by the author presenting experiences of a fictional family of early America, the James Gould family who struggled with problems of Indians and slavery.

Members of Society 8 will be guests of Society 22 at a luncheon on March 11, 1:00 p.m., in Willow Street U.C.C. Church. Those desiring to go should meet at the Mt. Joy Mennonite Church at 11:30 a.m. that day. The next regular meeting of Society 8 will be held March 15, 2:00 p.m., at the home of Mrs. Paul Witman, where a guest, Mrs. Lorenzo Tucci, will speak on "Crosses."

Attractive refreshments reminiscent of Valentine Day were served by the hostesses, Miss Anna Mae Eby, Miss Ruth Eby, Mrs. Harold Drager, and Miss Mary Shaeffer.

Society 13

Farm Women Society 13 met Thursday evening, Feb. 13, at the home of Mrs. Claude Miller, Lampeter Rd., Lancaster.

The meeting was called to order by the president Mary Ann McClenaghan. The devotions were conducted by Mrs. Miller's daughter Mrs. Weaver of New Holland.

Plans were made to entertain Society 30 at a luncheon meeting at the Farm and Home Center, March 8 at 1:00 p.m. Also a decision was made to have a white elephant sale for the April meeting at the home of Mrs. Raymond Dealinger.

Prizes were awarded to three members for the prettiest, most original and cutest valentines. Receiving the awards were Mary Sayres, Ruth Schroeder and Maude Werner.

Mrs. Cora Frymyer gave an interesting and instructional talk on making decorations for the home using dried and pressed flowers, weeds cones and spices.

Society 21

Farm Women Society 21 met February 13, at the home of Mrs. Howard Steinberg, Quarryville, R2 with Mrs. Parke Ressel as co-hostess.

President, Mrs. Frank Aument led the business meeting.

Mrs. Harold Graybeal and Mrs. Steinberg showed slides of their trips.

The next meeting will be held March 13, 1975 at the home of Mrs. John DeLong, R1, New Providence, Pa.

Mrs. Robert Bucher will present an artificial fruit demonstration and members will model their original "Easter Bonnet".

Society 22

Society of Farm Women 22 met recently at the home of Mrs. Jay Landis. Co-hostess for the program was Mrs. Robert Houser.

Mrs. Henry Hess conducted the business meeting in which the Society decided to hold a food stand at the Stanley Groff sale on Feb. 28.

Following the business meeting, an afternoon of fun and games was held. Society 22 will entertain Society 8 at a luncheon at the Willow Street United Church of Christ on March 11 at 1:00 p.m.

Society 31

Farm Women Society 31 held their meeting Feb. 17, at the home of Mrs. James Groff with Mrs. Carlton Groff as co-hostess.

Roll call for the evening was "Where were you when your husband proposed to you?"

Mrs. Donald Trimble and Mrs. Curtis Akers reported on the State Convention. The county project for the coming year will be for retarded children in Lancaster County. A gift of $100 will be given to the Jill Eshlemen fund.

The society will have a food stand at the farm sale of Paul Weaver on March 22.

The program for the evening was a demonstration of Merle Norman Cosmetics given by Gloria Lammy. The next meeting will be at the home of Mrs. Paul Trible on March 17.

ORGANIC LIVING

By

Robert Rodale

HOUSEHOLD TECHNOLOGY WASTES MORE TIME (AND MONEY) THAN IT SAVES

Americans love technology, especially in their homes. They buy electric can openers to save muscle power, electric stoves with two or even three ovens, electric knives with enough power to carve up a side of beef, and a whole cross section of implements invented by latter-day Leonardos whose ultimate goal is to separate you from your hard-earned money.

Why bother with those things' Probably the most common reply is that the convenience of those labor-saving devices allows the homemaker more leisure time by freeing him or her from the drudgery associated with housework.

Unfortunately, we've all been sold a bill of goods. A recent study completed by a sociologist Joann Vanek of New York's Queens College shows that, despite the wide range of modern conveniences, modern women spend

more time doing housework than their mothers and grandmothers did.

The survey, which included an analysis of 20 studies done over the past 50 years, pointed out two household tasks in particular that take significantly longer to complete today than they did in the "good old days."

One is laundry. Perhaps you have childhood memories of Saturday mornings in your home. Your mother worked long and hard — for about four hours — over tubs of hot, soapy water while doing the family's laundry.

But surprisingly enough, it now takes about six hours a week to do the family's wash. Perhaps, as Prof. Vanek said, "people have more clothes now than they did in the past and they wash them more."

Another job that now takes longer to do is shopping. Back in the 1930s, shopping for the family took about two hours a week. Today, Prof. Vanek estimates, the typical housewife spends approximately one full day every week simply travelling to and from stores.

Prof. Vanek's study is important for two reasons. One, it debunks the myth of the labor-saving device. Secondly, the study indicates directions we should take to adjust our lifestyles and to win back some of our freedom from machines.

I'm sure that if you planned your shopping trips more carefully, you could eliminate more than half of them. Make a list, buy what you need and avoid return trips. Car pools are still good ideas, even if many don't want to participate in them. The time you save can be put to fruitful use in a garden or at a money-making hobby.

Examine your laundry habits. Sort the clothes into separate hampers as they become soiled, not on wash day. Wash with full loads whenever possible. These steps will significantly reduce the amount of time you spend at this necessary, but boring job.

Generally, there are some jobs that you might be doing now that you could eliminate completely. Perhaps it hadn't occurred to you that you don't have to iron socks, towels or sheets. It's a waste of effort and time.

Think about every job before you start it. How much space do you need? Where should materials be placed" What's the bare minimum of work needed to finish" In what order should steps be taken?

Get everything together you need for the job before you begin. There's nothing more discouraging than having a pair of wet hands while wallpapering, only to discover that you didn't bring along a towel.

In most cases, you'll find that by thinking before you act, you'll save time. You might even save money. By eliminating part of your ironing, for example, your electricity bill will be that much lower. By not washing clothes so often, you'll be doing the same thing.

Fortunately, you can't eliminate all your work. Dr Lenore R. Zohman, a New York heart specialist, said recently that people should program their housework to get valuable exercise at the same time. Scrubbing floors on hands and knees (rather than standing and using a mop) provides good exercise

Dr. Zohman said it's possible to program housework so one can have a "very clean house, a very nice figure and a very strong heart."

It's time to reassess your household schedule. Eliminate the frills. Stick to the basics. Work with what you have, and try to consume less Use your head instead of your wallet. You may be surprised to find you gain more free time.

xxx

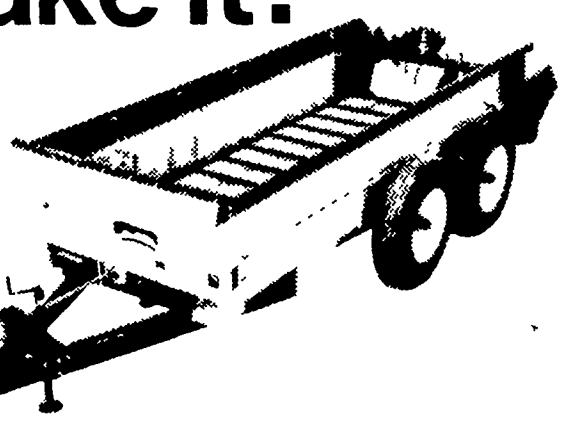
New Idea's Manure Spreaders
Wood can take it!



That's why they use Penta treated clear yellow pine in every New Idea Spreader box.

Every New Idea spreader in the line has wood sides, bottom and end . . . because wood can take it. Wood battles against damage. Wood won't bend, can't rust . . . and fights corrosive acids better than any other spreader box material.

Warranty On Wood That's why only New Idea says, "In the unlikely event that any of the wood components in your New Idea Manure Spreader rot through, Avco New Idea will make replacement, no charge. Replacement will be made without cost to you, the original purchaser, at your nearby New Idea dealer . . . no charge for wood, no charge for labor or freight."

WOW! THAT IS BOUMATIC
Yes, It Is True!

84% of all cows in the state of California are milked with Bou-Matic Milkers.

MR. DAIRYMAN;

The dairy farmer in California, due to his breeding and management and his feeding program, has come up with a very high productive herd over the last 8 years

These rolling herd averages are 54 pounds and up which is nothing uncommon, they were forced to look into better milking systems that would do the job with a minimum of udder irritations such as:

1—Low Vacuum of 10½" to 11½"
2—Not flooding at the teat end
3—No back flushing of the teat canal
4—Proper pulsations per minute
5—Milking all four quarters out together
6—Alternating twin-pulsation for front & rear quarters

7—Inflations which prevent the lines from bulging and climbing
8—Visi-claw for visible milking - plus many more features

Whether you are milking 15 cows or 1500 it will pay you to investigate what Bou-Matic can do for you and your herd. A Dari-Kool Bou-Matic Milking System along with good herd management has proved a winning combination for thousands of dairymen. Ask any Dari-Kool Bou-Matic user.

Get big litters of husky pigs...Feed Purina Sow Chow

A sow is a pig factory. She has the big job of producing and nursing two litters of pigs every year.

Like any other factory, she has to have raw ingredients to produce the products (pigs) and maintain the factory (her own body). If she doesn't get proper nutrition, she may actually resorb some pigs into her system, causing you to lose pigs you will never even see; or she may farrow weak, unthrifty litters.

Purina Sow Chow has what it takes to help the sow keep her own body, farrow big litters and have plenty of milk to start them right. Purina Sow Chow is available as a supplement to your grain or as a complete sow ration.

Ask us for Purina Sow Chow soon.

From Local Ag Teachers:

Thoughts in Passing

Agriculture Evangelism
by Gerald Martin
Student Teacher
Ephrata High School

Today 10,000 people will die of starvation. Malnutrition affects at least 400 million people - or possibly twice as many. In 1970 a U.N. study on the world's children stated: "Every half minute 100 children are born in developing countries. Twenty of them will die within the year. Of the 80 who survive, 60 will suffer from malnutrition." The pictures of world starvation and suffering that could be painted are many: the people who ask for poison instead of water so as to end their misery and despair. This is a demonstration of a second type of starvation, that which is spiritual. Agriculture can possibly meet the food needs of a ballooning population, but it can never meet the deep spiritual hunger that these people are experiencing. Only Jesus Christ can meet these needs; only He can bring hope in a desperate situation To meet both these situations agriculture evangelism is needed.

Why agriculture evangelism? Agriculture because food production is essential to evangelism in a world of hunger. Evangelism because "Man shall not live by bread alone." To provide a complete understanding of agriculture evangelism the following question must be answered. "How can you meet a persons spiritual hunger when is suffering from physical hunger?" The way to reach any man is through a demonstration of God's redeeming love for him. Christ preached to the multitudes but He also fed them. He commands us to do the same. Each man must be met at his need, whether spiritual or physical. If we are to convince people that God is concerned in their eternal well-being we must show them that He is concerned about their temporal needs. Every problem of man must be met by the grace of God coupled with the stewardship of man. God has given us the resources but we are the stewards of the resources. Our witness must be the stewardship of our God-given resources in helping people to feed themselves. The war against hunger and poverty is a spiritual battle. Faith and obedience are required for victory, faith in God and obedience to apply the best scientific principles.

Some may ask why must there be a Christian emphasis. There are several reasons why this is so. Progress requires faith and must be rooted solely in Jesus Christ not in an organization, fertilizers, seeds, or chickens. The course of help is more important than the help itself, because the source is eternal while the help is temporal. This body will decay but man's spirit is eternal. This must be our first priority when we help people.

Garden Spot Receives Equipment

A Model 3000 tractor power train and 10-speed powershift transmission were presented today to Garden Spot High School by Ford Motor Company's Tractor and Implement Operations - North America.

The equipment, consisting of a three-cylinder diesel engine, eight-speed manual transmission rear axle and the 10-speed transmission, was donated by Ford at the recommendation of the school's vocational agricultural instructor, Dr. Robert D. Herr, Honorary American Farmer.

Honorary American Farmers are selected annually by the National Future Farmers of America for the highest honor the organization bestows to non-members. Dr. Herr was one of 77 vo-ag instructors so honored in 1973 and invited to nominate a qualified school of his choice to receive an equipmient donation from Ford.

The Ford power train, worth more than $8,600, will be used for instruction in the school's vocational shop courses.

Donald A. Scheaffer, school principal, joined Dr. Herr in accepting the unit from John Watson, zone manager for Tractor and Implement Operations' Eastern district office in Richmond, Va., and Allen H. Matz, president of Allen H. Matz, Inc., the New Holland Ford Tractor dealership.

Mr. Matz noted the serviceman of today is a highly trained technician, and that the need for such qualified men has increased markedly. "Thus," he said, "we are very pleased to assist in making this equipment available to Garden Spot High School."

Selection of Honorary American Farmers is based on a score card of achievement which includes years of service, the number of award-winning FFA members developed, number of members established in farming and agriculturally - related businesses, records of group achievements posted by the local FFA chapter served as advisor, and community-service accomplishments.

A total of 219 Ford tractor power trains–worth more than $1,253,600– was donated to educational institutions in 1973, bringing the total donations of Ford tractor components since 1961 to 1,996, worth more than $8,744,000.

The power train program is one of several Ford agricultural assistance programs carried on to further the knowledge and development of the industry. Others are the annual Ford Farm Efficiency Awards program, the Educational Equipment Leasing Program, and donations of the Ford Almanac to vocational evening classes attended by approximately 250,000 full-time commercial farmers.

"WE REFUSE TO PARTICIPATE IN THE RECESSION"

Obviously, all of us can be hurt badly by the recession if it is permitted to continue. When we say we refuse to participate in it, we mean that in conducting the operation of our business we will not go along with the "Nervous Nelly" approach, and cut advertising, sales help and purchases. We have, indeed, increased all three.

"Recession" is nothing but a National state of mind. When people think things are going poorly, they squirrel their money away, don't spend it, and things do get bad. If we can encourage others to act boldly and with confidence in our business, not only will we sell more equipment, but the slump will end.

We can count on little from our politicians, but the spirit which made America great is still prevalant among the pople in general and American business in particular. If others will join us in our fight, our efforts can mushroom and we can beat this thing.

John L. Stauffer

Soil Survey Conducted

Soil technologists at The Pennsylvania State University have mapped the soil characteristics of more than 87 per cent of the state - 45 of Pennsylvania's 67 counties - in a project that has been under way since 1957.

The major aim of the project is to characterize soils to be found in the state in terms of location and description, and physical, chemical, and mineralogical analyses. Interpretations are then drawn as to the suitability of the soil for different land uses.

The project, directed by Dr. Roy P. Matelski, professor of soil genesis and morphology, is a joint effort of the Pennsylvania Department of Environmental Resources and the U.S. Department of Agriculture. The State Department of Environmental Resources recently awarded a grant of $123,250 to continue the project.

Initial soil mapping of the entire state is expected to be completed by 1980. Work has already begun, however, on updating results and remaping areas covered in earlier surveys.

According to Dr. Matelski, the survey is now used primarily by urban and suburban developers, as it is especially suited for engineering uses. Interpretation of the results indicates which soils are best suited for agriculture, recreation, forestry and wildlife or industrial development.

Samples for the survey are obtained by digging pits, 8 feet wide by 12 feet long, from the topsoil down to bedrock. Ten to 16 pits are dug in each county. The locations are selected to give a variety od samples from cultivated fields, pastures, forests, and surburban and industrial areas.

LAUNDRY TIP

To save time and energy include one big item like a blanket-in the regular family wash each week This system prevents a periodic build-up of extra laundry

FFA - Hope for the Future

One of the best examples of youth in action on the American scene today is the FFA, the national organization for students studying vocational agriculture in the public high schools. It is an organization run by the student members under adult guidance.

Soon after vocational agriculture became a subject in many of the nation's high school in 1917, instructors became aware of the need to provide practical training beyond the traditional classroom approach. Their idea was to make the instruction more interesting by making practical work experience, competitive livestock judging, and agricultural leadership development activities part of the instruction. Vocational agriculture instructors and students eagerly accepted the learn by doing principle.

The FFA was founded nationally in 1928 after similar organizations had started in several states. Right from the beginning, the FFA has stressed leadership, cooperation and citizenship - all vital to success in modern agriculture.

Today the FFA has a membership of over 450,000 with chapters in approximately 8,000 high schools throughout the nation. The organization has state associations in all states, except Alaska and in Puerto Rico.

Vocational Agriculture or agribusiness programs are funded in part by the National Vocational Education Acts through the U.S. Office of Education, state departments of education and the local school systems. The FFA operates under a federal charter granted by an Act of Congress in 1950 (Public Law 740, 81st Congress). The charter provides for a national board of directors and board of student officers elected from the membership.

FFA activities are specifically designed to be a part of the instructional program in vocational agriculture. Members learn through active participation how to conduct and take part in public meetings, how to speak in public, and how to take a leadership role in their school and community.

Each local chapter and each state association elects its own officers each year. In all cases the teacher of vocational agriculture is the advisor of the local FFA chapter and the State supervisor of agricultural education is the advisor of the state association.

FFA members have full opportunity to practice the principles of democracy in conducting the affairs of their organization by exercising their privilege to vote at chapter meetings, serve on committees, and otherwise assist in carrying on the work of their organization. Elected delegates to the state and national conventions, held each year are asked to decide on major issues facing the organization.

Advancement through the degrees in the organization from the Green Hand through the Chapter Farmer, State Farmer and American Farmer or Agribusinessman is based on achievement in farming, ranching, or agribusiness careers.

Nearly 8,000 public schools have FFA chapters. One of the requirements for membership in FFA is that a student be enrolled in vocational agriculture. Students may retain their membership until they are 21.

Competition is a key element of the FFA from the chapter to the national level. Each year the FFA recognizes more than 80,000 members at local, state and national levels for outstanding achievement in activities related to agriculture career and leadership development.

Funds for awards are provided by more than 700 businesses, organizations, and individuals that sponsor FFA programs through the National FFA Foundation, Inc. The Foundation provides nearly half a million dollars to make the incentive awards available to deserving FFA members in the following award programs: Star Farmer and Star Agribusinessman awards, 19 agricultural proficiency awards, public speaking, national chapter awards, national chapter safety, Building Our American Communities Awards, national judging contests, establishment in agriculture awards, and through state initiated programs for improving agricultural leadership.

Recent food shortages in this country have reaffirmed the need for continuing a strong program of vocational agriculture and the FFA. Thus there is a bright future for trained agriculturists ready to serve America.

New Herbicides Available

Farmers should be prepared to use some of the newer herbicides this spring and summer since many of the older chemicals will be scarce, says Dr. Nathan L. Hartwig, weed scientist at The Pennsylvania State University.

"While the prices for herbicides will be somewhat higher this year, don't cut the application rates to save money. A loss of just 1 bushel of corn per acre is a loss of 2 to 3 dollars per acre," Dr. Hartwig stated during the annual meeting of the Pennsylvania Plant Food and Protectant Educational Society held recently at University Park.

He indicated there are a number of new herbicides labeled, or likely to be labeled, for use on soybeans. These are all closely related to Treflan and Planavin, two fairly common weed killers. The new ones include Tolban, Cobex, and others.

The above herbicides are all effective in controlling annual grasses but are weak in controlling yellow nutsedge, quackgrass, and other perennial weeds--in addition to common ragweed, velvetleaf, smartweed, and cocklebur.

Basagran is a relatively new herbicide to use after soybeans have emerged. It gives excellent control of 2 to 3 inch annual broadleaved weeds except for redroot pigweed--but is useless on grasses. Basagran will also control yellow nutsedge after it is 6 to 8 inches tall, but it may not control broadleaved weeds adequately after they are this tall.

"Don't depend on Basagran for your total weed control program. Instead, use it as an emergency clean-up treatment for preplant or preemergence treatments that may have missed certain weeds," Dr. Hartwig suggested.

Some liquid herbicides will be available in more concentrated formulations than in previous years, the Penn State weed scientist pointed out. This is a trend which means less solvents, fewer containers, and less shipping and storage costs.

Some new formulations of Sutan "plus" and Eradicane contain 6.7 pounds of active material instead of the original 6 pounds per gallon. This means application rates must be adjusted accordingly. He added that Eptam and Vernam formulations will contain 7 pounds of active material per gallon instead of 6.

FFA Region I

Members of the Pennsylvania Farmer's Association, Region I (consisting of counties in southeastern Penna.) assembled at the Holiday Inn West, Allentown as a culmination of their efforts in procuring new members for the organization. Forty-four persons from Berks County attended.

The membership goal is allocated by the State Board of PFA and Berks Co. was the 15th county in the state to reach their goal. Berks County members in PFA number 893, a gain of 26 over 1974, and 15 more than the designated number set by the state.

The membership chairman in Berks was Mr. John Stump of Bernville R1 and co-chairman was Mr. Ernest Heckman of Hamburg R1. Mr. Stump remarked, "The enthusiasm of the workers attaining the new members was the key to the success of this project." Desk sets were presented to these two men by the state organization for their efforts in organizing the group of workers.

Mr. David Hauseman, Oley R1, was declared the "King Pin Winner", having secured 17 new members. Mr. George Moyer, Myerstown R1 who secured 14 new members and Mr. Joe Gaetani of Temple who secured 11 members were honored at this affair. They will each be presented a PFA cap and a letter of commendation from the Berks County executive board.

Guests at this dinner meeting were: Mr. Gene McDowell, PFA Regional Organizational Director; Mr. Chester Heim, PFA Public Affairs Director; and Mr. Arthur Hershey, Cochranville, Penna., member of State Board of Directors.

The speakers were Mr. Frank O'Connell, Jr., of Kingston, Pa. and Mr. Kevin Hall, Vice President of National FFA.

Door prizes which were all agricultural products; namely mushrooms (both fresh and canned), potatoes, and rosebuds and carnations were awarded.

A meeting honoring all new members of the PFA organization and their families will be held in the near future. A victory party for all Berks County membership workers and their families is scheduled for Feb. 22 at the Bernville Grange at 7:30. Mr. William Myer, President of Berks PFA will show slides of Australia which were taken on his recent trip there.

Berks County Ladies Day Out will be held at Riveredge on March 26.

Members from Berks Legislative committee will be visiting their Congressmen and Senators in Washington on March 12 and 13 and the State Assemblymen at Harrisburg on April 7.

Indians believed that the world rests on the head of an elephant, whose movements cause earthquakes!

Sure, we run short on supply sometimes, just like everyone has been. But, we've got a lot more going in the long run than just selling "product."

We offer the "Complete Approach" . . . a program backed by the entire Ortho Marketing and Agronomy Team.

What does this mean to you, the customer? Help on soil sampling. Sound fertilizer recommendations that get the best use out of the supply available Equipment and personnel for timely custom application. And detailed record-keeping services on your field locations, nutrient levels, and management history.

Come the harvest, you get the best reward of all. a top-quality, high-yield harvest.

Talk to us . . we're part of a team you can rely on.

The Ortho team approach helps you produce.

York 4-H Plans Promotion Week

The annual "4-H Promotion Week" will highlight the month of March during which the York County 4-H Council along with the numerous community clubs will be sponsoring promotion activities.

Starting the week off will be several 4-H members making radio spots at local radio stations proclaiming the week as "4-H Promotion Week" and will introduce briefly a few of the many aspects of 4-H work. These radio spots will be broadcast during the week of March 1 to the 8th.

A Poster Contest involving all interested York County 4-H members will be entered at the Family Fun Night. These posters will be displayed at restaurants, banks, stores, and any other business where the public may observe the posters. These posters will be judged by parents, leaders, and 4-H members present at the Family Night. The posters will contain a theme dealing with the 4-H program. The winning poster will be sent to the state poster contest.

The local community 4-H clubs will be displaying club exhibits out in the community to publicize 4-H.

To finish out this outstanding week will be the York County 4-H Family Night on March 8. Here 4-H members and their parents can have a high kicking fun time after feasting on great Pennsylvania Dutch cooking in the form of a covered dish which will precede the evening fun at 7:00 p.m. at the 4-H Center.

The evening entertainment will include square dancing for all the people that have a lot of youth in them and love a high kicking time; bingo, for those people who are not as energetic, but still crave fun and excitement; mixers and relays for the Teen bunch, and for the little tots, 'story Hour' and many more surprises.

The nationally recognized "4-H Promotion Week" is a week whereby 4-H is publicized to show the public what 4-H does. 4-H is an exciting and educational experience and if you are between the ages 8 and 19 years of age, you can join the organization. Adult Leaders are also needed and if you are someone who wants responsibility, fun, and a place to learn, 4-H is for you. To join, please contact the York County Extension Office at 848-2101.

Holstein Completes Record

A Registered Holstein cow owned by Willow Maple Farm, Newmanstown, has completed a production record exceeding 30,000 lbs. of milk according to the Holstein - Friesian Association of America.

Willow Maple Reflection Mae 6594935 (GP) actually produced a total of 30,620 lbs. of milk and 1,137 lbs. of butterfat in 357 days.

Her record started at the age of 7 years 5 months. On a two times-per-day milking schedule, she averaged nearly 40 quarts of milk each day throughout her testing period. This Holstein's production is more than three times that of the average dairy cow.

Willow Maple Reflection Mae was sired by Lime Rock Reflection Oscar 1453923 (GP)

Producttion sampling, weighing and testing operations were supervised by Pennsylvania State University working in cooperation with the national Holstein organization.

COOKING CHEESE

One cardinal rule to remember when cooking with cheese a little cooking at low heat Cheese, like other protein foods, is toughened by high heat and overcooking

Twin Valley YF Welding Course Set

A adult arc welding school will begin on Monday, February 24 at 7:30 p.m. in the vocational agriculture shop of the Twin Valley High School. Ronald L. Frederick and Wayne K. Lutz, teachers of agriculture, will instruct the class.

The special adult program will be for beginners and others wishing to improve their welding skills. The course will be designed to meet the needs of farmers and farm related occupations. Areas of study will include welding in flat, horizontal, vertical, and overhead positions; welding cast iron; and hard-surfacing.

Classes will meet on four consecutive Monday evenings - February 24, March 3, 10, and 17. Each session will begin at 7:30 p.m. Featured on March 10 will be the Berks Welding Supply Co. demonstrating the capabilities and versatility of the arc welder.

A nominal fee will be charged to defray the cost of electrodes and electricity.

BONES

It is estimated that bones take up about 25 to 30 percent of the space allocated to meat in your freezer Leave out the bones and you can use that space for more food

the best helper any farmer can get

One of the friendly people at the Friendly First is Bob Badger — President of the Friendly First Farm Loan Corporation.

Bob's a native of the area — lives on State Street in Quarryville with his wife and two children — talks farm lingo and understands the problems that beset today's farmer. He's a Vice President of our Installment Loan Department and is a long-time expert at solving money needs for farm maintenance . . . new equipment and stock . . . plus all the other requirements that keep your farm a profitable operation.

Funds are now available for any and all agricultural needs. If you need help, come in and talk things over with Bob — the best helper any farmer can get! Give him a call at 687-8611.

Officer's Training Set For York 4-Hers

What's Parliamentary Procedure? This is one of the many questions to be discussed at the 1975 York - County Officers Training Meeting on February 26 at 7:30 p.m. at the York County 4-H Center. Here officers from some 15 clubs throughout York County wil learn how to properly execute their office they hold in their local club and how to successfully carry out their officer responsibilities.

The Red Lion High School Parliamentary Procedure Team will give a presentation on how to properly conduct a business meeting. Then the York County 4-H Council officers will conduct workshops on the offices of President, Vice President, Secretary, Treasurer, Newsreporter, Recreational Director, and Historian.

The President and Vice President workshop will involve learning how to conduct a business meeting, how to pass legislation through use of motions, how a President can introduce legislation. The Secretary workshop will show how to write an acceptable secretary's report that keeps the records of the activities of a club. The Treasurer workshop will educate the treasurers in keeping accurate financial records for a club. The Newsreporter workshop will inform the newsreporters how to write news articles that will be acceptable for newspapers and the York County 4-H Reporter. The Recreational Director workshop will give Song and Game Leaders a chance to learn games and songs they may take back to their clubs to teach other 4-H members. The Historian Workshop will give the Historians knowledge of how to properly put a scrapbook together containing photos and news articles of their club's activities. There will be sample Historian record books at the workshop to look at.

It is recommended that all officers from all the clubs within the York County 4-H program attend this educational seminar. There will be something useful for everyone to learn about.

Ayrshire Completes Record

In the herd of Milton M. Brubaker, Spruce Villa Farm, Lititz, Pa., a senior-three-year old registered Ayrshire cow named Spruce Villa Com Star has completed an official milk production record of 12380 pounds, with 536 pounds of butterfat, on twice daily milking for 305-day DHIR Testing period. This record is one of many being made by an increasing number of registered Ayrshires on the Ayrshire Breeders' Association official DHIR testing program.

Star's record is 1⅛ times the national average for all dairy cows. The Ayrshire breed is noted for persistent, profitable production of nutritious, quality milk.

Ag Dept. Housing Plan to Use Local Labor, Leadership

Awards for completing a year of driving without a preventable accident were presented to 26 Agway truck operators from this area at a dinner February 20, 1975 at York, Pa.

Drivers honored and their years of accident-free driving are: Wilbur B. Shultz - Lancaster Store, 5 years; Vernon Frankhouser - Lancaster Store, 9 years; Donald B. Groff - New Holland Store, 6 years; Stephen M. Kurtz - New Holland Store, 7 years; E. Phares Martin - New Holland Store, 9 years; Wayne M. Carrigan - Quarryville Store, 2 years; Harvey J. Walton - Quarryville Store, 3 years; Donald Carrigan - Quarryville Store, 4 years; Melvin L. Hollinger - Quarryville Store, 4 years; W. Verne Anderson - Quarryville Store, 11 years; Samuel B. Heisey - Salunga Store, 1 year; David S. Musser - Salunga Store, 3 years; Nathan Dombach - Lancaster Petroleum, 1 year; Carl G. Groff - Lancaster Petroleum, 2 years; Glenn L. Hassel - Lancaster Petroleum, 2 years; Paul A. Kauffman - Lancaster Petroleum, 2 years; Kenneth W. Bradford - Lancaster Petroleum, 5 years; Mervin Weaver - Lancaster Petroleum, 6 years; Edward G. McMullen - Lancaster Petroleum, 7 years; S. Roy Hollinger - Lancaster Petroleum, 9 years; Roy M. Gerlach - Lancaster Petroleum, 11 years; Mark Burkholder - Lancaster Petroleum, 12 years; Paul E. Miller - Lancaster Petroleum, 12 years; Morgan B. Zook - Lancaster Petroleum, 12 years; Clair L. Shimp - Lancaster Petroleum, 12 years; H. Paul Huber - Lancaster Petroleum, 13 years.

These men are among the 1,635 drivers throughout Agway who were recognized for safe driving records of one to 30 years. This represents about two-thirds of Agway's 2,450 full time drivers. Almost half of the drivers honored this year are receiving awards for five or more years of safe driving.

Agway drivers covered more than 56 million miles in 1974, operating vehicles from small service vans to tractor-trailers.

The number of accidents involving Agway vehicles dropped in 1974 from 452 to 427, despite an increase of 70 in the number of trucks in the Agway fleet.

Agway's accident rate is 0.76 accidents per 100,000 miles, compared with the national average of 1.22 accidents per 100,000 miles for all fleets reporting such statistics to the National Safety Council.

Awards were presented by Agway area manager James Waters and petroleum district manager Robert Sowerbrower. Richard Charles of Syracuse, N. Y. represented the Agway Safety Department.

Order 4 Milk Price Up 11¢

The January uniform price for base milk in Federal Order 4 increased 11 cents from the previous month according to Andrew A. Marvin, local fieldman for Inter-State Milk Producers Cooperative. Excess milk showed an increase of 36 cents. The January base milk price was $8.94, excess was $6.86, and the butterfat differential was 7.7-cents.

In comparison to January levels one year ago, base milk was down 57 cents and excess down 12 cents.

The weighted average price for the market was down 63 cents compared to January 1974.

A total of 402 million pounds of producer milk was pooled in January of which 64.71 percent was sold as Class I, showing an increase of 1.11 percent of deliveries made in December, and a .02 percent increase over January a year ago. 7598 Order No. 4 producers provided 12.9 million pounds per day to dealers during January, averaging 1707 pounds per farm per day. Total value of producer milk was set at $34,513,564.09 for the month.

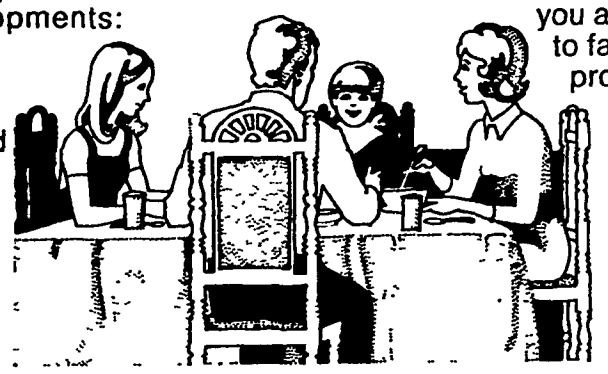
IT'S IDEAL FOR BULK FEEDING

STAUFFER GARAGE
MARTINDALE, PA. 17549 PHONE 215-445-6465

If you're optimistic about farming in 1975 — you're right!

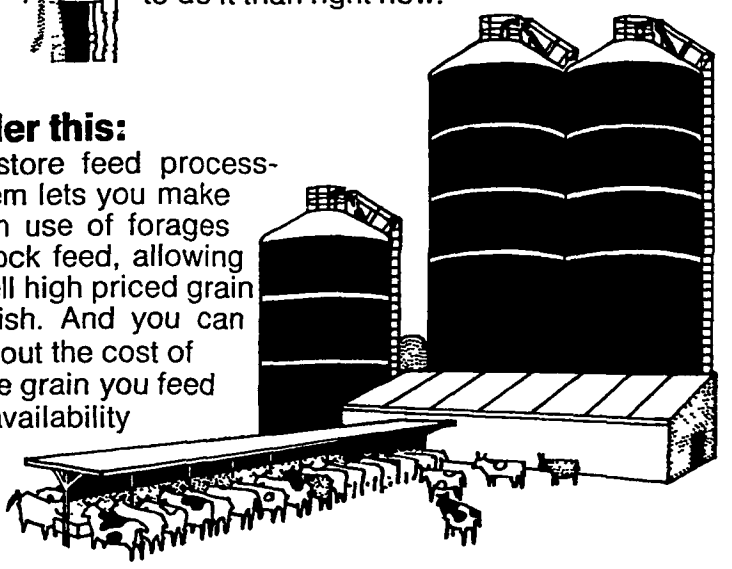
Part of the story you've heard before:
The world needs more food than it can produce, population keeps on growing and the people of the world insist on eating better every year. Now add these developments: First, the "cheap protein" plan for feeding the poor people of the world doesn't look as promising as it once did. Second, the idea of opening up whole new areas of the world to farming doesn't look so hot, either. Third—and most important—we've been on this course now for many years and time is running out.



Main Point:
One real ray of hope is *you* and your ability to produce food. Regardless of weather and the rest of the economy, the people of North America and the rest of the world want what you produce—and all indications are that in the final analysis, they're going to be willing to pay for it.

It's true . . .
you are going to continue to face rising costs of production, increased taxes and higher land costs. However, you have the opportunity to become more efficient and there'll never be a better time to do it than right now.

Consider this:
A Harvestore feed processing system lets you make maximum use of forages as livestock feed, allowing you to sell high priced grain if you wish. And you can forget about the cost of drying the grain you feed and the availability of fuel to operate the dryer because you can store high moisture grain. Even if drought or early frost cost you your entire grain yield, you can salvage about 40% of the feed value of the plant by processing the stalks and husks through your Harvestore system.



Finally,
we should add this: We're not asking you to do anything we don't expect to do for ourselves. For instance, we have just completed a multimillion dollar expansion program that doubles our capacity for building Harvestores and we've asked our dealers to grow along with us so that they can continue to be in a position to give you the products and services you need when you need them.

Now is the time
to gear up and move out before costs go up any more. We're ready when you are.

The new DeKalb, Illinois plant is just under 10 acres under one roof. This will double the company's ability to produce Harvestore structures.

Withdrawal of DES Extended

Livestock feeders using diethlstilbestrol (DES) will be required to withhold the growth stimulant from slaughter animals for 14 days, instead of 7, effective immediately, The U.S. Department of Agriculture (USDA) announced recently.

Effective March 17, feeders will also be required to file a certificate stating that they have not fed DES to livestock in the 14 days prior to sale for slaughter.

"The longer withdrawal period will provide additional protection to the consumer from possible residues of DES appearing in the meat supply, and also give more protection to the producer against potential violation of the law," said Dr. Francis J. Mulhern, administrator of USDA's Animal and Plant Health Inspection Service (APHIS).

APHIS officials added the livestock industry has promised its cooperation in educating producers to the new withdrawal period.

DES is a synthetic hormone used primarily on cattle and sheep to promote growth so animals reach slaughter weight more quickly at less cost.

If not used according to label directions, DES can leave residues in slaughter animals; however, residues have been detected only in internal organs and not in muscle tissue. Federal law prohibits the marketing of meat from animals which have DES residues at the time of slaughter.

Residue violations found by APHIS inspectors, when verified, are turned over to the Food and Drug Administration (FDA) for possible legal action.

The certification procedures that were readopted were last in effect in 1972, but were dropped in 1973, when the FDA banned DES use in feed. The ban was overturned by a U.S. Court of Appeal, Jan. 24, 1974.

Dr. Mulhern said the educational aspects of the certification program are important and will be stressed in preventing residue violations. He explained livestock producers will be constantly reminded of the precautions they must take when using DES. In addition, the certification program offers an enforcement tool which compliments existing sanctions.

New regulations will provide that certificates showing proper withdrawal from DES must be presented to a federal inspector before slaughter. Marketing agencies or dealers may issue certification based on the certification from previous owners.

Alternatives are holding of animals at a slaughter establishment on DES-free feed for 14 days, or slaughter and retention of meat until analysis of samples show the animal was free of residues.

COUNTRY GENTLEMAN'S FARM

PUBLIC SALE

REAL ESTATE

SATURDAY, MARCH 1, 1975

2:00 P.M.

Just West of Rothsville on the Newport Road, Approximately 24 acres, including a:

2½-STORY BRICK FARM HOUSE, Large Bank Barn with Attached Wagon Shed, Tobacco Shed.

This Farm House was just recently remodeled from head to toe. First Floor with large Living Room, Dining Room, New Kitchen, Laundry and Powder Room. On the Second Floor are 4 Large Bedrooms with spacious Closets and a Bath.

Third Floor is finished for storage.

The House has a New Hot Water Heating System and a New Roof. The Living areas all newly Carpeted. All other buildings are in good repair and House and Barn are recently painted. This property also includes a good well.

There is frontage on Newport Road and Rothsville Station Road. This would be a real good place to raise a family or could also be used as a Horse Farm. Property has easy access to Route 772 with approximately 20-minute drive to downtown Lancaster.

Don't Miss this Opportunity to BUY a Real Nice HOME in the Country with unlimited possibilities.

SALE TIME — 2:00 P.M.

AGWAY

DO-IT-YOURSELF PROTEIN

Take the Agway clear-seeding alfalfa route and get up to four tons of protein-rich forage this year

Four tons of alfalfa in the year of seeding? It's a practical objective that has already been accomplished on many dairy farms where the Agway clear-seeding alfalfa program has been followed. And that's just the first year. Farmers in southern Pennsylvania following the program recommendations are getting as much as eight or nine tons a year for at least three succeeding years. Translate yields such as these into protein production and you will see why alfalfa can well be one of your most profitable crops. That first year, a four-ton yield is the equal of a 40-bushel soybean crop. Seven-ton yields produce as much protein as fields yielding a phenomenal 100 bushels of soybeans per acre.

Consider how this kind of production can cut your feed expenses. Then call Agway and put the clear-seeding program to work growing protein for your herd this year.

AGWAY ALFALFA SEED

Call soon and place your order for top quality Agway seed. At this time Agway can supply Vernal, Iroquois and Saranac. You'll be amazed at its rapid growth, producing a good harvest within 70 days after seeding. And a second cutting in another 35 to 40 days!
